INTRODUCTORY.

The fifth biennial edition of the MICHIGAN STATE GAZETTEER AND BUSINESS DIRECTORY, which is herewith placed before the public, is believed to be more thorough and complete than any of its predecessors. It contains 640 pages more of descriptive and business matter than the first edition, which was published in 1873, and an excess of 140 pages over the volume issued two years ago. The Classified Business portion of the work, as compared with the last volume, shows an increase of forty-five pages, and, while somewhat less compactly printed than the former, contains at least 4,000 more names. This portion of the work will be found especially complete and valuable for reference, containing, as it does, a total list of about 43,000 professional and business men. The rapid extension of manufacturing and business enterprises into the central and northern portions of the state, resulting largely from the development of the vast timber forests and rich agricultural lands found in those sections, together with the general progress which is everywhere manifest, renders a much more extended individual canvass necessary than formerly, thus largely increasing the labor and cost of publication with each succeeding issue of the work; but notwithstanding it is constantly growing in value, both as an advertising medium and work of reference, no advance has thus far been made either in the rates of advertising or price of the book. A work of this kind necessarily involves a great amount of labor and the expenditure of large sums of money, neither of which has in any instance been withheld, the aim of the publishers being to make it, in every respect, creditable to themselves and worthy the confidence and support of the public.

Among the features in the present volume that will be found of especial interest, are a shippers' guide to every hamlet and postoffice in the state, revised up to the present spring; a complete list of the postoffices in the state, showing the money order offices, domestic and foreign, corrected up to April first of the present year; a list of banks and bankers, with officers and capital employed; lists of state and county officers; collection laws of Michigan, etc.

In returning their thanks to the business men of the state for the liberal manner in which their various works have been received, the publishers would also offer their congratulations upon the many substantial evidences of commercial prosperity that are everywhere manifest. The outlook is decidedly bright, and every indication points to the fact that the state now has before it a career of success never before equaled.

CAUTION.

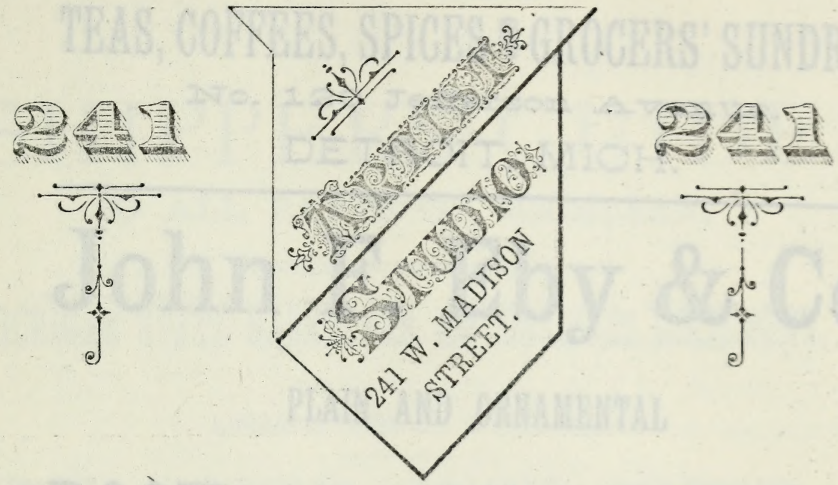
The publishers wish to caution the public against the payment of any money for subscriptions or advertising, in advance, to persons representing themselves as agents for this work. No one is authorized to make any collections whatever in advance of delivery of the book.

We are led to mention this from the factthat certain parties fraudulently claiming to be our agents, have been soliciting payment for patronage in advance.

T. WICKERSHAM,



Portrait Painting

IN OIL COLORS A SPECIALTY.

Satisfactory Likenesses painted from Life, or from Photographs, Ambrotypes, Tintypes, or old Daguerreotypes. True copies guaranteed.

Portrait Painting is the most difficult branch of the fine arts. Truth in outlines—accuracy in forms—these are essential in faithful portraiture. The least deviation in the preliminary sketch renders the work utterly worthless, even if it be afterwards well handled and beautifully colored.

Therefore, to be secure against errors of this nature, I accept as a "modern improvement," the advantages of Photography, and the uses of the negative in making the sketch, which secures a MORE PERFECT OUTLINE OF THE HEAD, than can be drawn from life by the most experienced artist. A portrait, thus drawn and finished by sittings from life, will, without doubt, be a true likeness of the subject; and I assure my patrons that they will agree with me on this point after they shall have seen their orders completed. Many artists fail in the details of drawing as well as in coloring; and it is for this reason that so many bad pictures are seen suspended in the parlors of those who have attempted to obtain correct portraits of the loved ones at home. It pains one to see the caricatures for which they have paid a fair price, when their places might be filled by pictures that would be not only true likenesses of those whom they represent, but also beautiful specimens of art in color and finish.

Residents of the city and visitors from abroad are invited to call and examine my work.

Persons at a distance can have their orders filled by sending small picture with sample of hair and dress, and other instructions to me, addressed as above.

CAUTION.

Pay no money in advance to itinerant Directory Canvassers. We are led to mention this from the fact that certain parties have been fraudulently using our book as a specimen, and by that means, collecting moneys in advance. We ask no payment until the work is delivered, and our Solicitors have strict orders not to take payment for either advertisements or subscriptions.

THE STATE OF MICHIGAN.

Michigan, originally a portion of the famous "Northwest Territory," was admitted into the Federal Union in January, 1837. It is located on the British American frontier, and is separated from the Dominion of Canada by Lakes Superior, Huron and St. Clair and their connecting straits. It extends, approximately, from latitude 41.7 degrees to 47.48 degrees; and from longitude 82.41 degrees to 90.54 degrees, and covers an area of 56,451 square miles. It is divided into two parts—the Lower and the Upper Peninsulas, which are separated by the Straits of Mackinac and contiguous waters. Although united politically these two divisions are thus disjoined geographically, and they also differ widely in physical characteristics and resources. The Lower Peninsula is for the most part level and prairie-like, or moderately rolling, and excellently adapted to agriculture; while the Upper Peninsula is hilly and rugged and even mountainous, and is distinguished principally for its abundant mineral resources.

The Lower Peninsula is bounded on the east by Lakes Huron, St. Clair, etc.; and on the west by Lake Michigan. It is 277 miles long from south to north; and its greatest width is 259 miles. It has an area of 33,871 square miles, or 21,677,184 acres.

The Upper Peninsula is 318 miles long, east and west; and its greatest breadth is 164.286 miles; with an area of 22,580 square miles or 14,451,456 acres. It is bounded on the north by Lake Superior and on the south by Lake Michigan, the Straits of Mackinac, etc., and the State of Wisconsin. These great waters give the State a shore line of 1,620 miles, and being at the head of lake navigation, where the products of the West aim to reach water transportation to the seaboard, they have contributed immensely to the State's commercial prominence and prosperity.

THE NATURAL RESOURCES

Of Michigan are very varied. Those of the Lower Peninsula (first to be mentioned) are agricultural. Michigan is officially shown to be the 7th wheat producing State in the Union, being surpassed only by California, Minnesota, Ohio, Indiana, Illinois and Iowa in the order named; but it also raises large crops of nearly every other form of farm produce; and its farmers are among the most prosperous of their class in the Union.

THE WHEAT CROP.

For the years 1879 and 1880 the yield of wheat was as follows:

	Bushels.
1879—Official State Report	30,983,340
1880—Estimate Dept. of Agriculture	30,705,000

In 1879 each of the following counties in Michigan produced over 1,000,000 bushels of wheat—viz.:

	Bushels.		Bushels.
Clinton	1,509,611	Kalamazoo	1,354,483
Ionia	1,474,889	Kent	1,238,109
Washtenaw	1,449,772	St. Joseph	1,184,075
Calhoun	1,449,438	Lenawee	1,087,467
Jackson	1,365,546	Oakland	1,042,761

In 1879 twenty townships in Michigan produced over 100,000 bushels of wheat.

The official report of the Secretary of State gives the

FARM PRODUCTS

Of Michigan as follows for 1879—the latest year for which official figures are attainable:

	Acres Harvested.	Bushels Raised.	Average bu. per Acre.
Wheat	1,605,636	30,983,340	19.30

The Lower Peninsula abounds in salt to an unlimited extent, has large beds of merchantable coal and peat, paying beds of plaster, exhaustless beds of superior building stone, limestone, gritstone, lithographic stone, etc.; brick clay, fire clay, potters' clay, etc., in abundance; mineral paints, sand and gravel for building and for glass-making; mineral springs, chalybeate, sulphurous, etc., and many other things of use and value which space forbids to enumerate.

The Upper Peninsula affords iron in endless quantity, enormous deposits of copper, and large beds of marble, building stone, slating, etc., as will appear later.

THE SALT PRODUCT.

Two great salt basins underlie the Lower Peninsula of Michigan, affording her the greatest saltiferous stores of any State east of the Mississippi: 1. The Waverly group of rocks, whose only outcroppings are found around Saginaw and on the eastern shore of Lake Michigan; and 2. The Helderberg group, which is nearly 2,000 feet below the surface.

The first named basin as at present developed embraces an area of about 8,000 square miles, chiefly about the navigable waters of the Saginaw Valley and on the Lake Huron shore in the counties of Bay, Saginaw, Huron, Iosco and Midland. Recently wells have been sunk in Gratiot county, etc., but definite results have not been reached.

Wells are projected in other localities in order to test the full extent of the salt producing area of this basin.

The salt manufacture of Michigan is under State inspection; and from the official reports the following figures are taken:

There are 97 firms engaged in the business, operating 3 kettle, 31 pan, and 85 steam blocks—making a total of 119 salt blocks, having a manufacturing capacity of 3,150,000 barrels, or 15,750,000 bushels of salt. The manufacture embraces both solar evaporation and boiling; and the product is equal to the finest Onondaga salt. The business is under the supervision of a State inspector, and a rigid system of classification is followed. During 1879 and 1880 the amounts inspected were as follows:

	1879—Bbls.	1880.—Bbls.
Fine	1,997,350	2,589,037
Packers'	15,641	16,691
Solar	18,020	22,237
2d Quality	29,027	48,623
Total	2,058,040	2,676,588

The amount of salt inspected since 1869, the first year of the State inspection, is as follows:

	Bbls.		Bbls.
1869	561,288	1875	1,081,865
1870	621,352	1876	1,462,729
1871	728,175	1877	1,660,997
1872	724,481	1878	1,885,884
1873	823,346	1879	2,058,040
1874	1,026,979	1880	2,676,588
Total			15,311,724
Estimated product before 1869			3,553,645
Grand Total			18,865,369

The quantity of brine in the basin is unknown, but it is believed to be inexhaustible; so that the increase in manufacture will continue with the growth of the country.

THE LOWER BASIN

Underlies almost the whole Southern Peninsula. Its existence has been known to geologists, but no attempts have been made to reach it. However, just as this article is being sent to press, it is announced that brine answering to a 90 per cent. test has been found at Manistee, at a depth of 1,950 feet, reaching the Helderberg formation; and that a well is projected at Cheboygan to reach the same stratum. When this vast basin is made to yield its unlimited wealth, Michigan may confidently expect to become the greatest salt producing district in the country—if not in the world.

In addition to the above figures may be mentioned a considerable business that has grown up from the utilization of "salt refuse," such as bromine, chloride of magnesium, chloride of calcium, and soda and soda salts.

THE COAL FIELDS

Of the Lower Peninsula have not been accurately bounded. They are known to underlie the whole central area of the Peninsula, embracing the counties of Saginaw, Shiawassee, Clinton, Ionia, Montcalm, Gratiot, Isabella and Midland, besides the greater parts of Tuscola, Genesee, Ingham, Eaton, Bay—nearly the whole of thirteen counties; besides considerable portions of Livingston and Jackson counties; covering about 187 townships and embracing 6,700 square miles. Jackson is the only place where much mining has been done; the eight mines in that county in 1880 employed 500 men and yielded 125,000 tons of coal.

This coal is bituminous, and analysis gave the following:

Carbon	45	per cent.
Volatile matter	49	" "
Ash, water, sulphur	6	" "
	100	" "

It is rich in gas and coke—producing 4.20 feet to a pound of coal, and 40 bushels of coke to the ton of coal.

A mine (or mines) is being worked at Corunna, Shiawassee County, furnishing a good article to that region. Explorations are being made in other sections.

GYPSUM.

Large and well-worked beds of plaster exist at Grand Rapids, and at Tawas bay, in Iosco county. This plaster is found, by analysis, to be equal to the Ohio plaster; and the quantity appears to be limitless.

LUMBER, ETC.

The lumber region of Michigan covers the northern half of the Lower Peninsula and is divided into several well-defined districts, named from the principal stream or some similar geographical characteristic. Complete statistics of this industry are hard to obtain, but the best figures show that there are 523 large lumbering mills in the State, and that the product for 1880 was as follows.

Lumber—number feet	3,769,166,329
Excess over cut of 1879 about	658,000,000
Shingles	2,428,659,320
Excess over 1879	370,574,480

Besides a very large amount of lath. Michigan now supplies one-quarter of all the pine lumber used in the United States. It is estimated that there is now standing in Michigan 44,000,000,000 feet of pine which at the present rate will last only some eleven years. However, the land when cleared is excellent for farming.

Among other valuable woods grown in Michigan, are black walnut, hickory, ash and maple. The latter is not only important as lumber but yields a not inconsiderable crop of sugar. The last statistical census gave the yield at over four million pounds.

UPPER PENINSULA—IRON AND COPPER.

The Iron region of the Upper Peninsular embraces an area of 1,192 square miles. This district abounds in ore of surpassing richness, remarkably free from deleterious substances, and worked with very great facility; and these facts, together with the exceeding tenacity of the iron manufactured therefrom, have conspired to build up an industry within less than twenty years that is one of the wonders of the world. The ore mined belongs chiefly to four classes: specular hematite, magnetic, soft hematite, and second-class specular; and in about the following proportion; 66 per cent. specular hematite; 17 per cent. magnetic; 13 per cent. soft hematite; 4 per cent. second-class specular. These ores yield from 50 to 65 per cent. of merchantable metallic iron; and in strength and tenacity it is superior to any iron made in the world.

During 1880, the output of iron ore amounted to 1,975,602 gross tons, valued at $17,261,023. The pig iron manufactured amounted to 48,352 tons, representing a value of $1,940,080.

The above figures taken from a Lake Superior journal agree very closely with returns made to the State for purposes of taxation. The Auditor-General reports production, etc., for 1879 and 1880 as follows:

	1879.	1880.
Number companies	27	41
Product	1,601,519 tons, 840 lbs.	1,973,157 tons, 240 lbs.
Taxes paid	$12,671 04	$15,908 54

For the period of 25 years up to and including 1880, the gross shipments of iron ore were 15,309,132 tons, with value of $117,061,506; and during the same period 790,277 tons of pig iron were shipped.

There are 60 mines now worked.

COPPER.

The copper region of the Upper Peninsula is the largest and richest in the known world. It extends 120 miles along Lake Superior, and embraces an area of 1,186 square miles. The product is *native copper*, not alloyed; and it is generally so much better adapted for special purposes as to command a higher price in the markets of the world.

The Auditor-General's report for 1879 and 1880 presents the following statistics of product, taxes paid, etc.

	1879.	1880.
Number companies	25	38
Product	21,875 tons, 153 lbs.	29,776 tons, 1,463 lbs.
Taxes paid	$14,007 68	$18,774 80

The product for these years is estimated to be worth $13,225,000; and for the 26 years from and including 1855, the total value of the copper crop of Michigan is about $136,619,000.

MISCELLANEOUS.

Other resources of the Upper Peninsula are as follows:

Roof slating of the best quality is found in abundance.

Excellent sandstone, of unsurpassed quality for building, is found in an area of 9,982 square miles.

An excellent quality of marble is found, widely distributed.

The region has also a considerable lumber interest; and the adaptability of a considerable portion of it for farming purposes is becoming apparent.

THE FISHERIES

Of Michigan constitute a considerable item in her resources. Her 1,620 miles of coast line have made a fishing village of nearly every port; and among the places where the business has assumed largest proportions are Detroit and its environs, the Saginaws, Grand Haven and St. Joseph. The amount of capital invested is not far from $350,000, and the yearly "catch" is near 150,000 barrels. From these waters the markets East, West and South, are supplied with choicest sturgeon, trout, whitefish, etc.

The State has 5,000 inland lakes, and this circumstance has greatly contributed to the success of the efforts of the State in the direction of pisciculture; and it is expected that soon the large lakes and rivers of the State will be well stocked with brook and lake trout, California salmon, German carp and other fish of high commercial value.

SUMMARY OF NATURAL PRODUCTS.

In his outgoing message, in January, 1881, Gov. Croswell estimated the farm, timber, mineral and fish crops of the State at $169,500,000, as follows:

Agricultural products	$88,500,000
Timber	60,000,000
Copper—21,840 tons	8,000,000
Iron—1,925,000 gross tons	10,000,000
Salt—2,676,588 barrels	2,000,000
Fish	1,000,000
	$169,500,000

THE GOVERNMENT OF MICHIGAN

Is divided into three departments—legislative, executive and judicial.

The Legislature is composed of a Senate of 32 members and a House of Representatives of 100 members, elected biennially and holding biennial sessions.

The executive department is composed of a Governor and State officers, also elected every two years.

The judicial department is embraced in a Supreme Court, in Circuit Courts, and in Justice Courts; with such additional tribunals in large cities as experience has shown to be necessary.

The seat of government is at Lansing, where the State occupies a fine capitol, which cost $1,200,000.

POPULATION—VITAL STATISTICS.

The U. S. census of 1880 gives Michigan a population of 1,636,335, classed as follows:

Males	862,278	
Females	774,057	
		1,636,335
Native	1,247,989	
Foreign	388,346	
		1,636,335
White	1,614,087	
Colored	22,248	
		1,636,335

The following table exhibits the growth of the State in this respect since the first enumeration:

1800—(other than Indians)	551
1810	4,762
1820	8,896
1830	31,639
1840	212,267
1850	397,654
1854	507,521
1860	749,113
1864	803,661
1870	1,184,284
1874	1,334,031
1880	1,636,335

In early days Michigan was regarded as a very unhealthy State, and this adverse opinion greatly retarded its settlement. Statistics, however, show that it is among the healthiest communities in the Union. For a period of nine years the death rate (based on the official returns) has ranged from .85 per cent. in 1870 to 1.43 in 1873—being by years as follows: 1870, .933; 1871, .851; 1872, 1.155; 1873, 1.213; 1874, 1.066; 1875, .91; 1876, .95; 1877, .98; 1878, .96.

FINANCE AND TAXATION.

The finances of the State are in a healthy condition.

	Year Ending Sept. 30, 1879.	Year Ending Sept. 30, 1880.
Receipts all sources	$2,225,812 77	$2,793,321 90
All disbursements	2,019,885 59	1,820,946 42
Balance in treasury Sept. 30, 1880		1,578,642 01
Of which in sinking fund to pay bonded debt		1,208,895 27

Bonded debt of State same date.

Seven " " May 1, 1890	299,000 00	
Non-interest bearing	15,149 97	
		$905,149 97

It therefore appears that the State is virtually out of debt, but it has been found impossible to induce the holders of bonds to accept payment of their securities before they become due except on the payment of a very high premium.

SOURCES OF REVENUE.

The revenues of the State are chiefly derived from the taxation of all real and personal property in the State; except railways, mining companies, telegraph, express and insurance companies, etc., which pay specific taxes. The total receipts of the treasury for the fiscal year 1879 and 1880 were as follows:

	1879.	1880.
General taxes	$1,428,584 07	$1,874,724 03
Specific "	531,740 82	619,542 58
Other sources	265,487 88	299,055 29
	$2,225,812 77	$2,793,321 90

The specific taxes were derived from the following sources:

	1879.	1880.
Railroads	$428,901 96	$504,285 62
Freight, sleeping and palace cars	1,837 46	1,220 51

Insurance	70,186 48	70,752 03
Mining	26,678 72	34,683 34
River improvement	481 72	2,447 97
	$531,734 82	$619,747 36

VALUATION AND TAXATION.

The total valuation of the State as equalized by the State Board of Equalization is $630,000,000. This is probably not one-half the real valuation; and by doubling it and adding values not included in the assessment, such as railway property, churches, etc., there would result an aggregate estimated to range from $1,200,000,000 to $1,500,000,000.

The tax levy for the past six years has been as follows, in mills: 1876, 1.144; 1877, 1.7; 1878, 1.348; 1879, 1.830; 1880, 1.278; average, 1.217—on an equalized valuation of $630,000,000. The State debt being now virtually provided for, this rate is likely in coming years to be materially diminished.

NATIONAL BANKS.

There are 80 National Banks in Michigan, and their condition, December 31, 1880, was reported to the Comptroller of Currency as follows:

INSURANCE COMPANIES.

There are 211 insurance companies authorized to do business in this State. Of these 52 are incorporated under the laws of the State; one stock life insurance company; one stock fire insurance company; and 50 farmers' mutual fire insurance companies. Stock fire insurance companies from other States are 112; and those of foreign countries are 23.

The general financial standing of stock insurance companies doing business in the State is as follows:

Fire Companies.

Paid capital	$ 45,187,000 00
Total assets	119,742,000 00
Total liabilities including reserve and capital	86,037,000 00

MUTUAL INSURANCE.

The Farmers' Mutual Insurance Companies report the following:

Membership	69,535
Total risks	$120,274,287 00
Losses paid in 1880	181,370 00
Assessments in 1880	210,762 00

RAILROADS.

The railroad system of the State forms one of the most important factors to its progress. For some years succeeding the panic of 1873 the construction of new lines practically ceased. While from 1868 to 1874, no less than 2,128 miles were built, from 1874 to 1879 only 287 miles were constructed. In the latter year there were 40 companies doing business in Michigan, with a total mileage of 5,967—3,589 being in the State.

There are indications that the State, sharing in the general prosperity of the country, has entered upon a new era of railroad building. While the actual increase for 1879 and 1880 is but 354 miles, several important lines are in process of actual construction, and others are in an advanced stage of organization. Two new lines now being built are:

1. The Detroit, Mackinac & Marquette Railway—running from Mackinac to Marquette in the Upper Peninsula, and under contract to be finished in 1882. This line

will be an important link in the Northern Pacific Railway system, and its benefit to Michigan will be very great, since the extension of the Jackson, Lansing & Saginaw and Grand Rapids & Mackinac Railroads to the the Straits of Mackinac will place the two Peninsulas in close connection, and afford the rich mineral products of the Upper Peninsula a much more direct outlet to the Eastern market than has hitherto been the case. There are other railroad projects in the Upper Peninsula that will be tributary to this line with a vast amount of mineral and lumber products.

2. The Detroit, Butler & St. Louis Railroad, running from Detroit via Adrian, to Butler, Ind., where it strikes the great "Wabash system." This line will probably be in running order as soon as these pages are in the hands of the public. It will be operated by the Wabash company and will open a new and important avenue of commerce, connecting Michigan directly with the great railway system of St. Louis and the entire Southwestern trade of the country.

RAILROAD STATISTICS.

There are 49 railroad companies representing railroads in operation, with a mileage in the State of 3,918.

Their revenues for 1879 were $45,942,860.23; and for 1880, about $54,000,000.

The railroads paid in specific taxes in 1878, $410,453.06; in 1879, $445,399.80; and in 1880, $504,285.62.

The portions of these roads in Michigan represented a capital stock of $104,266,695.15, and a debt of $105,802,008.00—aggregating a total stock and debt liability of $210,068,703.15—an average of $53,616.31 per mile.

COMMERCE AND NAVIGATION.

Michigan's position on the shores of three great "inland seas" occasioned an early and strong development of her marine interests. It has been said that the volume of commerce which floats past Detroit exceeds the whole foreign commerce of the country. In developing this commerce Michigan men and money have done their share. For two years past the number of vessels documented in the four customs districts of the State have been as follows:

	June 30, 1879.		June 30, 1880.	
	Number.	Tonnage.	Number.	Tonnage.
Sailing	426	53,337.53	470	62,105.15
Steam	362	61,210.31	393	70,426.17
Barges	122	31,441.13	116	29,664.46
	910	145,988.97	979	162,195.78

Statement showing the number and tonnage of vessels engaged in the foreign trade which entered into the ports of Michigan from the Dominion of Canada, and which cleared from the ports of Michigan for the Dominion of Canada, during the two years ending June 30, 1879 and 1880, respectively.

SHIP BUILDING

Is an important Michigan industry. There are large ship-yards at Detroit and smaller ones at Bay City, etc.; and at Wyandotte are the largest iron ship yards in the West. Detroit is monopolizing the ship building of the lakes. During the two years ending June 30, 1880, there were built in Michigan as follows, as per official report of the Register of the U. S. treasury:

	June 30, 1879.		June 30, 1880.	
	Number.	Tonnage.	Number.	Tonnage.
Sailing	22	1,069.21	33	3,910.50
Steam	18	3,768.69	28	5,475.57
Barges	4	453.09	4	382.82
	44	5,290.99	65	9,768.89

Official statistics of a later date are not at hand, but the product for the year 1880—81 will largely exceed any previous year.

MANUFACTURES.

In many manufactures Michigan particularly excels—specially those dependent upon a supply of cheap iron and lumber—of which she has so great a store. Detroit is the greatest car and car-wheel town in the world. Grand Rapids is the greatest furniture producing city in the West. The State abounds in numerous streams which offer abundant water power for milling and factory purposes. Nearly every large town in the State is noted for some manufacture. Statistics on this subject, embracing the entire State are, however, not attainable, these having been gathered as a part of the census of 1880, not yet being in shape for summarization here.

SCHOOLS AND COLLEGES.

Michigan has always been foremost in the work of popular education. Her school system is theoretically perfect. She not only maintains a complete system of common schools, but high schools abound and are employed as stepping-stones to her magnificent University. Her primary and graded school statistics for the past two years are as follows:

	1879.	1880.
Children of school age—5 and 20	486,933	506,221
Children enrolled in schools	342,138	362,556
Per centage of attendance	70.2	71.6
School districts	6,252	6,352
Teachers employed	13,616	13,949
Teachers' wages	$1,880,945 24	$1,917,983 99
Total expenditures	$3,064,638 88	$3,109,915 14
Estimated value of school property	$9,011,454 00	$8,977,844 00

HIGHER INSTITUTIONS OF LEARNING.

The State maintains the University at Ann Arbor, the Normal School at Ypsilanti, the Agricultural College at Lansing, and the State Public School at Coldwater.

Since their establishment the State has expended for these schools, in buildings, instruction, etc., the following:

University	$1,784,332 51
Normal School	467,753 03
Agricultural College	663,800 72
State Public School	371,766 00
	$3,287,652 26
Add for primary schools	4,681,284 88
Grand educational aggregate	$7,970,937 14

CORRECTIONAL INSTITUTIONS.

The reformatory institutions of the State are the Reform School for Boys, at Lansing; the Reform School for Girls, at Adrian; State House of Correction at Ionia; and the State Prison, at Jackson. These have cost the State as follows:

Reform School	$761,031 18
*Reform School for Girls	6,424 88
State House of Correction	403,875 60
State Prison	939,680 68
	$2,111,012 34

*Now building, March 1, 1881.

CHARITABLE INSTITUTIONS.

These are the Michigan Asylum for the Insane, at Kalamazoo; Eastern Asylum for the Insane, at Pontiac; Deaf and Dumb Asylum, at Flint; and School for the Blind, temporarily at Lansing. These have cost the State as follows:

Insane—Eastern	$ 565,803 68
Insane—Michigan	1,247,655 19
Deaf, Dumb and Blind, Flint	1,063,933 23
School for Blind	6,081 87
	$2,883,473 97

These figures show that Michigan is behind no State, and is in advance of many, in her provisions for educating her young, in punishing her criminals and in caring for the unfortunate within her borders.

IN CONCLUSION.

We have thus endeavored to give a few plain figures regarding the "Peninsula State." There is, of course, room for expansion. The State holds 2,719,720 acres of land for sale to settlers. The railroads already existing and those in contemplation afford a guarantee of convenient markets to settlers in almost any part of the State, and make Michigan a very desirable region for immigrants. It possesses a healthy and bracing climate, greatly modified by the great lakes surrounding it; and offers settlers rich and varied natural resources, abundant land, near markets, a good soil, a thrifty government, and admirable school system and pleasant and desirable social relations. Its people claim that no State, East or West, offers superior advantages.

COLLECTION LAWS OF MICHIGAN.

ATTACHMENTS—Will issue: 1st. Where defendant (debtor) has absconded, or is about to abscond, from the State. 2d. That he is concealed therein to the injury of his creditors. 3d. That he has assigned, disposed of or concealed, or is about to assign, dispose of or conceal, any of his property with intent to defraud his creditors. 4th. That he has removed, or is about to remove, any of his property out of the State, with intent to defraud his creditors. 5th. That he has fraudulently contracted the debt, or incurred the obligation respecting which the suit is brought. 6th. That he is not a resident of the State, and has not resided therein for three months (one month in justice's court) immediately preceding the time of making the affidavit for the attachment. 7th. That the defendant is a foreign corporation. This last ground applies to courts of record, but not to justices' courts.

ARREST.—No arrest or imprisonment for debt, except for moneys collected in any professional employment, or for breach of promise to marry.

BILLS OF EXCHANGE AND NOTES.—Acceptance must be in writing on bill. On protested bills of exchange (drawn or indorsed in this State), when payable without the United States, damages and rates of exchange are as follows: 1st. The current rate of exchange at time of demand. 2d. Damages at rate of five (5) per cent. 3d. With interest on contents from date of protest. On protested bills of exchange, drawn or indorsed in this State, payable out of this State, but within the United States, the damages and rates of exchange are: In addition to the contents, with interest and costs, from 3 to 10 per cent. All checks, bills of exchange, or drafts on banks or bankers, have no grace. Guaranty of payment of note is negotiable, and passes to the holder of the note, by assignment of the note. No written assignment, but merely indorsement of notes or bills, is necessary to pass title. Holder of guaranty of payment of note can sue in his own name on the note and guaranty. Three days' grace is allowed on all notes, bills of exchange, drafts and orders payable within this State, except when payable on demand. Assignee of note or bill may sue in his own name. Suit may be brought by the legal owner. Where consideration for note is a patent right, the words "Given for patent right" must be on the face. Defense by purchaser same as original owner. It is a misdemeanor to deal with such notes not having said words on their face. There is no special form of note. Maker, indorser and guarantor of payment may be sued jointly. If last day of grace falls on Sunday, or any other legal holiday, the day previous is considered the last day of grace.

EXEMPTIONS.—A homestead, owned and actually occupied by the family, not exceeding forty acres, and the dwelling-house thereon, not included in any recorded town plat, or city or village, or instead thereof, at the option of the owner, one lot, within a recorded town plat, or city or village, not exceeding in the value of $1,500. This exemption also extends to the time it shall be occupied by the widow or minor children of a deceased person.

1st. All spinning wheels, weaving looms, with apparatus, and stoves in a dwelling-house.

2d. A seat, pew or slip occupied in any house of public worship.

3d. Cemeteries, tombs, rights of burial, while in use for repositories of the dead.

4th. All arms and accoutrements required by law to be kept; all wearing apparel of every person or family.

5th. The library and school-books of every individual and family not exceeding $150, and all family pictures.

6th. To each householder ten sheep and their fleeces, and the yarn or cloth manufactured from the same; two cows, five swine, and provisions and fuel for comfortable subsistence of such householder or family for six months.

7th. To each householder $250 worth of household effects.

8th. Two hundred and fifty dollars' worth of tools, implements, materials, apparatus, team and other things to enable any person to follow his trade, occupation or profession.

9th. A sufficient quantity of hay, grain, feed and roots, whether growing or otherwise, for properly keeping animals for six months.

10th. One sewing-machine for each family.

Twenty-five dollars due and owing to a married man for personal labor, from garnishee process.

All real and personal property is liable in execution for purchase price, though coming within the general exemptions, excepting mechanical tools and implements of husbandry.

EVIDENCE.—Parties in interest competent to testify, except to matters, which, if true, must have been within the knowledge of a deceased person, when a suit or proceeding is prosecuted or defended by the representative of the deceased. The same rule applies in the case of a surviving partner or partners.

LIMITATIONS.—1st. Actions for libel, slander, assault, trespass upon land, false imprisonment, within two years.

All actions of debt upon contract or liability, not under seal, of assumpsit founded upon any contract or liability, express or implied, for waste, for replevin and trover, and all other actions, for taking, detaining or injuring goods or chattels, and for all other actions not otherwise mentioned, within six years.

Actions for the recovery of real estate. Where defendant claims title by or through some deed, made upon a sale thereof by an executor, administrator or guardian, or by a sheriff, or other proper ministerial officer, under the order, judgment or decree of a competent court, in this State, within five years. Where defendant claims title under a deed made by some officer of this State, or of the United States, authorized to make deeds upon sale of lands for taxes assessed and levied within this State, within ten years; in all other cases, within fifteen years.

All suits for the recovery of any lands by the State must be commenced within twenty years.

Upon judgment, or decree in the United States Court, or any court of record, within ten years; justice's court judgment, within six years.

Claims against estate of deceased persons must be presented within such time as Probate Court shall direct—in the first instance, shall not exceed eighteen months, and not less than six months. The court may extend the time, but not to exceed two years from the time appointing commission to hear claims. In certain cases, Judge of Probate may revive commission for three months more. When death is caused by wrongful act, neglect or default, a railroad company is liable, not exceeding $5,000, to personal representatives of the deceased, and such action must be commenced within two years of the death of such person. Debt debarred by statute of limitations can only be revived by a promise in writing.

CHATTEL MORTGAGES—Must be recorded, otherwise void as against existing creditors or subsequent purchasers. Must also be renewed each year, or otherwise void. No lien, by way of mortgage or otherwise, can be created on, or sale made of exempt property, except for tools, implements, etc., to carry on trade, profession, etc., without the consent of the wife, if he have one, to such sale, or by her signing of said mortgage.

REAL MORTGAGES—Are merely securities for debt or obligation. A widow takes no dower against mortgage before marriage. Mortgages should be recorded in county in which the land lies. If not recorded, void as against subsequent purchaser for valuable consideration.

A deed or mortgage of homestead, without wife's signature, is absolutely void as to homestead interest.

MARRIED WOMEN—May own, hold and deal with their separate property as if single, and can deal with her husband. Husband is not liable for contracts of his wife as to her separate property. It seems that all common law disabilities of married women have been removed, except, probably, of becoming surety for her husband or third persons.

GARNISHEE PROCESS.—The statute provides for commencement of proceedings against garnishees in Justices' and Circuit Courts respectively, founded upon contract or upon judgment or decree.

STAY OF EXECUTION.—Execution may be stayed only in Justices' Courts by party against whom judgment is rendered, for a space of four months, when amount shall not exceed $50 exclusive of costs; for six months, when amount exceeds $50 exclusive of costs. Time computed from commencement of suit.

REDEMPTION.—One year is given after sale of real estate upon execution. Same where land is sold to satisfy mechanics' lien. Foreclosure of mortgage by advertisement, one year is given to parties in real interest. When mortgage is foreclosed in chancery, and sale under decree, there is no redemption. In chancery foreclosure it takes one year to complete purchaser's title; in the other, fifteen months.

INTEREST.—The legal rate of interest is seven per cent, but parties may contract in writing for a higher rate, not exceeding ten per cent. Penalty for usurious interest is forfeiture of excess.

JURISDICTION.—Justices' courts have original jurisdiction in all civil actions wherein the debt or damages do not exceed $100, and concurrent jurisdiction in all civil actions upon contract, express or implied, wherein the debt or damages do not exceed $300. No Justice of the Peace has jurisdiction in real estate actions, actions for disturbance of right of way, or other easement action for libel or slander, or for malicious prosecution and actions against executors or administrators, as such, unless specifically provided by law. Courts of record have original and concurrent jurisdiction in all civil actions for damages over $100.

In justice's court the summons, in case of a non-resident plaintiff, must be no less than two, and no more than four days, and must be served at least two days before the return day. In ordinary cases the summons must be no less than six and no more than twelve days, and must be served at least six days before the return day.

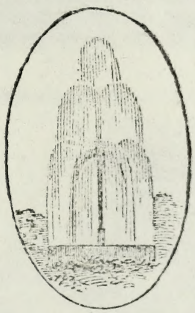
CONGRESS WATER COMPANY

Office, 94 Griswold Street,

DETROIT, MICH.



Michigan Congress Water is a Specific

for all diseases, chronic or acute, the result of indigestion, a fruitful source of many ills commonly requiring medical treatment.

It is an Agreeable Beverage

and is now coming into use as a table drink at hotels and private houses. It is an appetizer, and can be taken in sickness and in health.

It is not recommended for producing sudden effects in protracted ailments, but like many other hygienic agencies MICHIGAN CONGRESS WATER CURES where nostrums, although quicker in results, fail to eradidate disease.

MICHIGAN CONGRESS WATER is supplied IN CASES of PINT and QUART BOTTLES, always fresh and guaranteed pure, when labeled with the company's trade mark.

HARBOR SPRINGS.

Situated in Emmet county, of which it is the county seat, was formerly known as Little Traverse, which see for description and business directory.

HARRISON.

The county seat of Clare county, is located on the banks of Bud lake, one of the most beautiful inland bodies of water in northern Michigan. The village, a noted example of rapid growth, dates its existence from September, 1879, and now has over 500 inhabitants, which, at the present ratio of increase, will be doubled during the present year. A court house thirty-six feet square and two stories high has been erected at a cost of $3,000. Harrison is the present northern terminus of the Saginaw and Clare county branch of the F. & P. M. Ry, and has telephone communication with Harrison Junction, on the main line of that road. It has a steam saw-mill, a weekly newspaper, the *Clare County News*, and a number of business houses. Distance to Harrison Junction (Clare), 14 miles, to East Saginaw 65 miles, and to Detroit 164 miles. Nearest bank at Farwell. Mail, daily. Reuben Smith, postmaster.

URSULINE CONVENT

OF THE

SACRED HEART

Cor. Cherry and Erie Streets,

TOLEDO, OHIO.

This Institution, incorporated with the privileges of a College, is under the direction of the Ursuline Nuns.

The spiritual charge of the Convent is intrusted to an able Theologian, and the greatest possible attention is given to the religious training of the pupils. This feature, combined with the thorough method of instruction throughout the curriculum and the unrivaled advantages in the Musical Department, renders this institution worthy, in a particular manner, of the patronage of a discriminating public.

The course of studies embraces all the branches that are necessary to the acquisition of a solid and refined education. Gold Medals and Diplomas are conferred on graduates. Gold Medal for Domestic Economy, presented by Rt. Rev. Bishop Gilmour, Cleveland, Ohio. Gold Medal for Church History, presented by Rev. Dr. P. F. Quigley, Professor in St. Mary's Seminary, Cleveland, Ohio. Gold Medal for Logic, presented by Rev. Father Carroll, Canton, Ohio. Gold Medal for Good Conduct, presented by Mr. F. X. Pilliod, Toledo, Ohio. Gold Medal for best Prose Composition, presented by Hon. Edmund F. Dunne, Santa Fe, N. M. Examinations are held semi-annually; private, literary and musical re-unions take place every month, and official reports concerning the health, behavior and progress of the pupil, are transmitted at the end of each session to the parents or guardians.

Constant Care is Taken to Promote the Health and Comfort of the Pupils. Active Exercise in the Open Air is Enforced by Rule.

A Normal School is attached to the College, where great attention is paid to the thorough training of those preparing to teach.

Our Kindergarten is under the charge of a graduate from one of the celebrated Kindergarten Training Schools of New York City. Children from the age of three will be received.

LANDS.

The entire Land Grant to this Company unsold, consisting of about 150,000 Acres, is offered for Sale.

TIMBER LANDS.

The numerous streams and small lakes surrounded with Pine Timber along the line west of Reed City offer the best of locations for mills, where logs can be held safely, free of expense, and free from the annoyance of Boom Companies. The Railroad direct to East Saginaw, Detroit and Toledo, offers the best source of supplies, and a never failing market for Lumber, Shingles, etc., which may be delivered anywhere on the line.

FARMING LANDS,

As good as any in the world are to be found in abundance, and will be sold on the most favorable terms to actu l settlers. Some level, and heavily timbered with Oak, Beech, Maple, etc. Some rolling, with Beech, Maple, Rock Elm, etc. In fact, every variety of timber, soil and surface, can be found.

The Railroad is complete to Ludington on Lake Michigan. CHEAP LAND AND RAILROAD FACILITIES are seldom offered together. And those who wish to secure homes will do well to apply early and take choice selections.

TERMS OF SALE.—One-Fourth down, in all cases, and balance may be paid in three equal annual payments. TIMBER LANDS MUST BE PAID FOR BEFORE BEING CUT. FARMING LANDS, FOR ACTUAL SETTLEMENT, will be sold on payment of one-fourth in cash, and the balance in five equal annual payments.

Interest at the rate of seven per cent on all unpaid balances, to be paid annually.

All Contracts and Notes are made payable at MERCHANTS NATIONAL BANK, in East Saginaw.

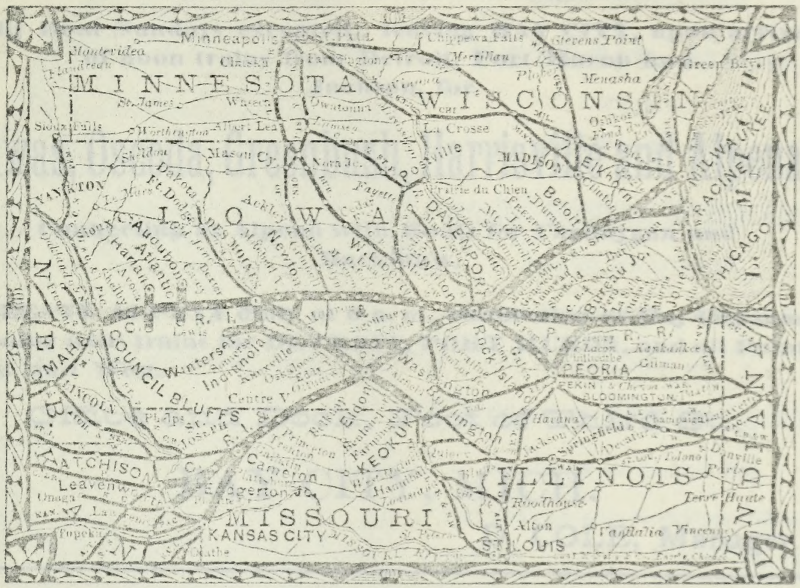
A MAN

WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE



CHICAGO, ROCK ISLAND & PACIFIC R. R.

IS THE GREAT CONNECTING LINK BETWEEN THE EAST & THE WEST!

Its main line runs from Chicago to Council Bluffs, passing through Joliet, Ottawa, La Salle, Geneseo, Moline, Rock Island, Davenport, West Liberty, Iowa City, Marengo, Brooklyn, Grinnell, Des Moines (the capital of Iowa), Stuart, Atlantic, and Avoca; with branches from Bureau Junction to Peoria; Wilton Junction to Muscatine, Washington, Fairfield, Eldon, Bentonsport, Centreville, Princeton, Trenton, Gallatin, Cameron, Leavenworth, Atchison, and Kansas City; Washington to Sigourney, Oskaloosa, and Knoxville; Keokuk to Farmington, Bonaparte, Bentonsport, Independence, Eldon, Ottumwa, Eddyville, Oskaloosa, Pella, Monroe, and Des Moines; Newton to Monroe; Des Moines to Indianola and Winterset; Atlantic to Lewis and Audubon; and Avoca to Harlan. This is positively the only Railroad, which owns, and operates a through line from Chicago into the State of Kansas.

Through Express Passenger Trains, with Pullman Palace Cars attached, are run each way daily between CHICAGO and PEORIA, KANSAS CITY, COUNCIL BLUFFS, LEAVENWORTH and ATCHISON. Through cars are also run between Milwaukee and Kansas City, via the "Milwaukee and Rock Island Short Line."

The "Great Rock Island" is magnificently equipped. Its road bed is simply perfect, and its track is laid with steel rails.

What will please you most will be the pleasure of enjoying your meals, while passing over the beautiful prairies of Illinois and Iowa, in one of our magnificent Dining Cars that accompany all Through Express Trains. You get an entire meal, as good as is served in any first-class hotel, for seventy-five cents.

Appreciating the fact that a majority of the people prefer separate apartments for different purposes (and the immense passenger business of this line warranting it), we are pleased to announce that this Company runs *Pullman Palace Sleeping Cars* for sleeping purposes, and *Palace Dining Cars* for eating purposes only. One other great feature of our Palace Cars is a SMOKING SALOON where you can enjoy your "Havana" at all hours of the day.

Magnificent Iron Bridges span the Mississippi and Missouri rivers at all points crossed by this line, and transfers are avoided at Council Bluffs, Kansas City, Leavenworth, and Atchison, connections being made in Union Depots.

THE PRINCIPAL R. R. CONNECTIONS OF THIS GREAT THROUGH LINE ARE AS FOLLOWS:

At CHICAGO, with all diverging lines for the East and South.

ADRIAN.

A thriving city of 8,000 inhabitants, is the judicial seat of Lenawee county. It is situated on the south branch of the River Raisin, in the central portion of the county, and is the most important place on the main line of the L. S. & M. S. Ry in the State between Toledo and Chicago. It is 33 miles northwest of the former, 210 east of the latter, 74 southwest of Detroit, 46 southeast of Jackson, and 83 southeast of Lansing. The county of Lenawee comprises some of the richest and most productive farming land in Michigan, and according to the reports from the Agricultural Bureau at Washington, it is said to be the most productive county in the United States. Owing to its central position, a large portion of the agricultural products of the county find their way to the Adrian markets, and the city is one of the largest shipping points for grain, fruit, dairy products, pork, lard, live stock, etc., in the State. The need that has long been felt for a competing railway outlet is now being supplied by the construction of the Detroit, Butler & St. Louis line, which will be opened to Detroit at an early day. The advantages afforded by this additional channel of communication will no doubt greatly enhance the growth and prosperity of the city.

The first move in the direction of a settlement was made in 1825, when the tract upon which the city is located was purchased from the general government by Addison J. Comstock, who, in the following year, moved on to the property. The village was laid out and recorded in

Detroit Mutual Benefit Association, 143 Griswold Street, insures all against Permanent Disability.

FEATHERS. Send for prices to the largest dealers in Michigan, MILLS & BARKER, 176 & 178 Woodward Ave., Detroit.

1828; the first hotel was built on the site of the present Lawrence House, in the same year; the first store and grist mill were erected in 1829, and the first church (Presbyterian) in 1832. The first newspaper, the prototype of the present daily *Times*, was established in 1834. In 1836, the Erie & Kalamazoo Railroad was completed between Toledo and Adrian, the oldest railroad in the State. In 1838, the rapid growth and central location of the village induced the removal of the public offices and records from Tecumseh, thus making it the county seat. The Michigan Southern Railroad was completed between Monroe and Adrian in 1840, and in 1843 extended to Hillsdale. Adrian obtained a city charter in 1853. Its growth has always been regular and substantial, the increase in population keeping pace with, but never exceeding, the legitimate requirements of labor, consequently the city has always been exempt from the panics that have proved so disastrous in other and less favored localities. Owing to its healthful location, pure water, and superior educational and social advantages, the city is unsurpassed as a place of residence, while an inviting field is presented for manufacturing and business enterprises.

The total bonded indebtedness of the city is $31,000, and the assessment for taxation is based upon one-third of the actual value of real and personal estate. This valuation, as placed for 1880, is $3,447,563, and for the county $27,000,000.

A paid fire department is supported, the apparatus consisting of two powerful steamers with hose trucks, a mounted Babcock chemical engine, and a large hook and ladder truck. It has a system of water works, is lighted with gas, and maintains an efficient and well paid police force.

Although essentially a commercial city, Adrian has a number of manufacturing enterprises, some of which are quite extensive. Among these are the car shops of the L. S. & M. S. Ry, a large paper mill, 3 or more flouring mills, a planing mill, plating works, 4 brick and tile yards and manufactories of brick machines, pumps, wind mills, furniture, carriages, soap, candles, crackers, a fruit packing house, brewery, etc.

The Peninsular Car Works of Detroit have within a few months occupied the buildings once used by the Adrian Car and Manufacturing Co., for a similar purpose, and, with the aid of some 300 workmen under the management of Mr. James Miller, are turning out a considerable number of cars.

The religious interests of the city are represented by Baptists, Congregationalists, Lutherans, Methodists, Presbyterians and Roman Catholics, each possessing elegant and substantial churches, constructed of stone and brick. The Episcopalians and United Brethren have neat frame structures, and the German Catholics a fine new brick edifice. There are also one or two colored churches.

The city now boasts a college, located near the western limits, on a pleasant and commanding site, and five public or union schools, incorporated and maintained under the provisions of a special act, approved March 13, 1861.

The Central School building, erected in 1868 at a cost of $80,000, is constructed of stone and brick, and is considered one of the model school buildings of the state. The aggregate cost of the four ward schools, which are of brick, roomy and substantial, was $35,000. Thirty teachers are employed, and 2,000 pupils are enrolled.

Adrian College, an institution controlled by the Methodist Protestant denomination, has an endowment of over $100,000, and grounds, structures and educational appliances valued considerably in excess of that sum. It suffered severe loss some few months since, when the north building was attacked by the fiery element and entirely consumed; but, with the indomitable energy which everywhere characterizes this sect, the principles of which are so ably expounded in the college buildings, the authorities have buckled on their armor and brought success out of disaster. To-day the outlook for a future of unexampled prosperity is very bright, and the citizens of Adrian are pushing on the good work right nobly. The north hall will be rebuilt before many months have elapsed, and the college reconstructed, as well as purified by fire, will go on in the great educational work to which it has been devoted. Twelve able exponents of the various branches are engaged in tuition, and some 200 students are receiving instruction. Some 4,000 volumes are placed at the disposition of students by the library and society authorities, and fine social privileges are enjoyed.

In addition to a fine public school library of 3,274 volumes, the Ladies' Library Association possesses a valuable collection of some 4,000 books.

The Charter of the Washington Life secures all the profits to the insured. More than this cannot be done. DR. S. L. FULLER, Gen'l Agent, DETROIT, MICH.

ROE STEPHENS, 184 & 186 Woodward Ave., Detroit, Mich., has the largest MUSIC STORE

The opera house, a modern structure, elegantly fitted up, has a seating capacity for 1,200 spectators.

Among the most prominent public buildings are the Masonic Temple, erected at a cost of $80,000, the State Reform School for Girls, recently constructed, and the Adrian College. The jail, completed in the fall of 1878 at a cost of $20,000, is a model of strength and security.

There are a number of good hotels, of which the Central and the Lawrence are well kept and deservedly popular.

The financial interests of the city are managed by two savings and three private banks, all established on a sound basis and well conducted.

The press is ably represented by one daily and weekly newspaper, two weeklies and two monthly journals. The *Times and Expositor*, published by Applegate & Fee, issues a daily and weekly edition, and is the outgrowth of the pioneer paper of the interior of the state. The *Weekly Press* was established in 1873 by Wm. A. Whitney, and is now conducted by W. Stearns. The *Journal*, the *Repertory*, a college monthly, and the *Methodist Protestant*, also a monthly, are issued.

Stage communication is had with Rome Center, 9 miles northwest, and Fairfield, 6 miles south; fare to either, 50 cents. Express, United States. Telegraph, Western Union. J. H. Fee, postmaster.

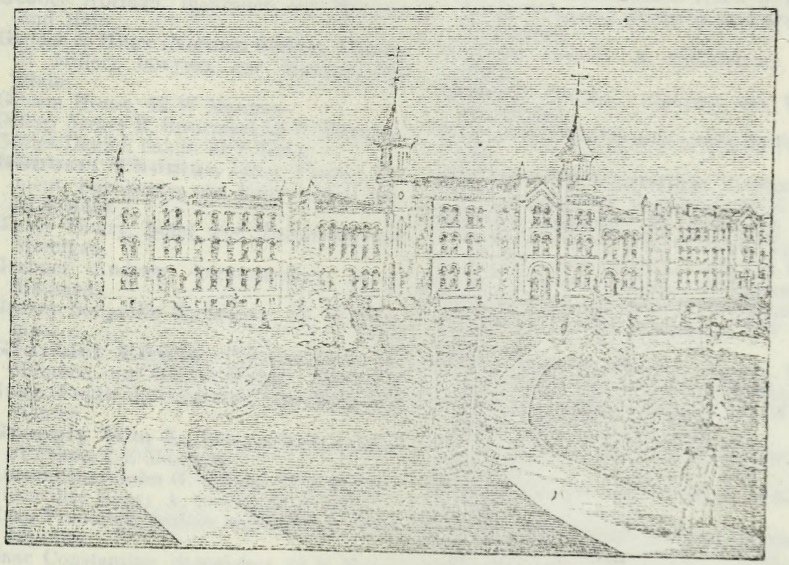
ADRIAN COLLEGE

Under the auspices of the Methodist Protestant Church.



SCHOOL OF ARTS.

Entrance upon any study is conditioned solely upon preparation for the pursuit of that study.

Our aim is to set up no arbitrary and artificial restrictions with reference to the entrance upon or the order of studies.

Students wishing to derive the benefit of collegiate instruction, but not prepared or unwilling to enter all Departments of instruction, will do well to send for a copy of the Annual Calendar.

Degrees conferred with the following requisitions: *Bach. of Arts;* the prescribed courses in the Departments of Ancient Languages, and sufficient elective courses in other Departments to amount in all to four years' work. *Bach. of Science;* the prescribed courses in the Departments of Mathematics and Natural Sciences, and electives to amount, in all, to four years. *Bach. of Philosophy;* the prescribed courses in the Departments of Philosophy and Social Science, and electives to make, in all, four years' work.

SCHOOL OF MUSIC, ample courses for both amateur and professional musicians.

SCHOOL OF THEOLOGY provides for the preparation of young men for the ministry.

PREPARATORY SCHOOL furnishes opportunity for instruction to those who are not ready for the collegiate departments.

Expenses very low. Board from $2.00 upwards. Room rent $10.00 per year upwards. Tuition $15.00 per year. Other expenses in proportion. For particulars, address

ALBION.

A prominent village of Calhoun county, containing about 4,000 inhabitants, lies on the M. C. R. R. at the crossing of the Lansing Div. of the L. S. & M. S. Ry, in the eastern part of the county. It is 20 miles west of Jackson, 12 miles east of Marshall, the county seat, and is pleasantly situated at the confluence of the two branches of the Kalamazoo river, in one of the richest and best-settled farming communities of the State. Unsurpassed water power is afforded by the river, and with excellent railroad facilities for reaching the markets east and west, Albion is destined to a continuous and permanent advancement. Albion college, under control of the Methodist Episcopal church, occupies a slight elevation in the eastern part of the village in the midst of spacious grounds, and presents an imposing appearance. It now numbers about 200 students. There are churches of the Baptist, Catholic, Episcopal, Methodist and Presbyterian denominations, and graded public schools employing 13 teachers. There are 3 hotels, 3 banks (1 national), 3 weekly newspapers,

and a neat opera house, seating 500. The fire department controls 1 steamer and 1 hand engine. The ground where the village now stands was entered in 1831 and a town site laid out in 1836; in 1838 a post-office was opened here, and in 1855 a village charter was obtained. The principal manufactures are lumber, flour and agricultural implements, and these, with grain and general farm products, constitute the chief exports. Farms in the vicinity are valued at $75 to $100 per acre. The United States and American Express and Western Union Telegraph Companies have offices here. Mail, daily. Martin Haven, postmaster.

ALLEGAN.

The judicial seat and principal town of Allegan county, is situated in a valley on the banks of the Kalamazoo river, which here affords an invaluable water power, including the whole volume of the stream with a fall of 8 feet. Water communication is afforded with Lake Michigan by steamboat daily, and it has three intersecting lines of railway, the Kalamazoo Div. L. S. & M. S. Ry, the Grand Haven R. R., and the Allegan and S. E. Br. G. R. & I. R. R. By these lines it is 25 miles northwest of Kalamazoo, 30 south of Grand Rapids, 23 southeast of Holland, and 169 west of Detroit. A settlement was located here in 1835. In 1838 the village was incorporated by the Legislature, and re-incorporated in 1858. The manufacturing interests of the place are extensive and varied, including 4 flour mills, 1 saw-mill, 1 furniture factory, 2 foundries, 1 fanning mill factory, 1 woolen mill, 1 sash and door factory, a spring bed factory, etc.

There are 7 churches of as many denominations, 5 ward schools with an enrolled list of 685 pupils, 2 libraries with 500 and 900 volumes respectively, a large public hall, an efficient fire department, and the Holly system of water works. Among the prominent buildings are the Presbyterian church, county buildings, fair ground buildings, and a number of large and really handsome business blocks. The village has a bonded indebtedness of $19,800, and an enrolled valuation of $750,000, which is considerably below its actual worth. There are 2 banks, the First National and a private institution, 4 newspapers, the *Journal*, *Democrat*, *Herald* and *Tribune*, all weeklies, and 2 good hotels. Allegan is surrounded by rich and exceedingly productive land, which, by a thorough system of cultivation, is made to yield abundant crops of cereals and fruit, as a shipping point for which the place is one of the largest in the state. Exports in 1879, via the L. S. & M. S. Ry, 11,423 tons. Population, according to last census, 2,327. Telegraph, Western Union. Express, American and United States. George R. Stone, postmaster.

ALMA.

An incorporated village of 640 inhabitants, in the northern part of Gratiot county. It is on the line between Arcada and Pine River townships, and is the western terminus of the Saginaw Valley & St. Louis R. R., and a station on the Chicago, Saginaw & Canada R. R., 3½ miles west of St. Louis, 37 west of Saginaw, 8½ northwest of Ithaca, the county seat, and 125 northwest of Detroit. Pine river affords good water power. The surrounding country embraces farming land of very fair quality, and an extensive lumbering region lies tributary to the town. These combined advantages render it a favorable point for manufacturing and business enterprises. Among the interests here are a woolen mill, a flouring mill, a foundry and machine shop, farm implement factory, panel factory, several saw-mills, a feed mill and elevator with a capacity of 7,000 bushels, a bank, a large public hall, seating capacity 1,000, a good graded public school, and a weekly newspaper, the *Index*. The churches are Baptist, Adventist, Congregational and Methodist. Building improvements to the value of $25,000 have been made during the past year. Unimproved farm land ranges in value from $5 to $12 per acre, and improved farms at from $15 to $40 per acre. A stage affords communication with St. Johns, 30 miles south, daily. Express, American. Mail, daily. Euphemia F. Quinn, postmaster.

ALPENA.

Is a growing city, situated at the head of Thunder Bay and at the mouth of Thunder Bay river, 230 miles north of Detroit and 120 from Bay City. It is the county seat of Alpena county, and at the last census numbered 6,284 inhabitants, being the largest and most important town on the west coast of Lake Huron north of Bay City. Its chief business is the manufacture of pine lumber, and fishing. It contains 11 large lumber mills and 4 shingle mills, which cut annually an average of 125,000,000 feet of logs. The fisheries, which are extensive, employ 250 men, and during the best of the fishing season an average of 10 tons of fish are shipped daily. The river affords power for only one mill, and is used principally for shipping lumber from the mills and for the steamboat trade. There are 7 church organizations, Congregational, Episcopal, Baptist, Methodist, Catholic, Norwegian Lutheran, and Dutch Reformed, all of which have good houses of worship. There are 10 public schools, with 12 teachers and 875 scholars; also a large Catholic parochial school; a public library of 2,500 volumes; 1 monthly and 3 weekly newspapers. The principal business blocks are built of brick. The new court house, a beautiful edifice, cost to build $20,000, and the opera house is one of the handsomest in Northern Michigan. The principal hotels are the Fletcher House, Alpena House, Golling House, Eagle and Globe Hotels. The city is provided with a paid fire department, and the Holly system of water works, which was put in at a cost of $65,000. The bay forms an excellent and capacious harbor, and a safe refuge for vessels from the fury of storms. The city has no railroad connections, but a daily line of boats runs to Bay City during the season of navigation, and a daily line of stages to Standish during winter, distance 90 miles. Three steamboats ply each week between this port and Detroit, Cleveland, Mackinac and intermediate points.

The land directly contiguous is light and sandy, but the greater portion of the county is a rich, friable soil, producing wheat, rye, oats, barley, and roots in great abundance. Average value, $65 per acre. Alpena was incorporated as a city in 1871, and has grown from 2,800 inhabitants in 1870 to its present number. It is enterprising, lively, full of business, and is destined to remain the metropolis of the shore. A mineral spring of considerable note here is much resorted to by invalids. Telegraph, Western Union. Express, Holt's. Robert J. Kelley, postmaster.

ANN ARBOR.

This city has a population of 8,200, exclusive of students, and is one of the finest and most healthy inland cities in the state, and the seat of justice for Washtenaw county. The plat of the village of Ann Arbor was recorded May 25, 1824, incorporated as a city April 4, 1851, and is situated on both sides of the Huron river, on the Michigan Central railroad, 38 miles west of Detroit, upon high, fertile grounds, originally covered with groves of oak timber. The river furnishes first-class water power, used for manufacturing purposes. Its streets are wide and clean, regularly laid out, crossing at right angles, handsomely bordered with shade trees, and lighted with gas. The real estate in the city is valued for purposes of taxation at $4,437,595, and the personal property at $937,720.

CHURCHES.

In churches, number and size, the city compares favorably with towns of larger population. Among the larger are the Methodist Episcopal, Presbyterian, Episcopal and Congregational, each of which has a large seating capacity. A new and elegant stone edifice is in process of construction by the Baptists, and the Unitarians contemplate the erection of one the current year, to cost $25,000. There are also two Lutheran, one Catholic, one German Methodist, one colored Methodist and one colored Baptist.

TRADE AND MANUFACTURES, ETC.

Ann Arbor is favored with a large and flourishing trade, largely increased by the building of the railroad from Toledo, and its completion north to Pontiac this year, where it forms a connection with the Grand Trunk, which will materially augment business.

It contains, besides a growing farm implement manufactory and furniture manufactory, many fine stores, book publishing, flouring mills, tanneries, boots and shoes, carriages, lumber, sash, doors and blinds, paper, woolens and breweries. There are four English weekly newspapers, viz., *Ann Arbor Argus*, *Ann Arbor Courier*, *Ann Arbor Democrat*, *Ann Arbor Register* and *Washtenaw Post* (German). The *Democrat* and *Post* are printed at the *Courier* office.

The principal hotels are the Cook House, Gregory House and Leonard House. The first two will accommodate 120 guests each, and the latter about 100.

There are two chartered banks, the First National with a capital of $150,000, and the Ann Arbor Savings Bank with a capital of $50,000. The American Express Co. transacts the express business, and telegraphic facilities are afforded by the Western Union and American lines.

SOCIETIES, ASSOCIATIONS, ETC.

Secret and other societies are numerous. Of Masons there are two subordinate lodges, one Chapter and one Commandery. Of Odd Fellows there are two subordinate lodges and one Encampment. Ann Arbor Scientific Association, a Good Templar's lodge, a lodge of Knights of Honor, two lodges of A. O. U. W., a Lecture, and a Young Men's Christian Association, a Ladies' Library Association with 2,400 volumes, a German Laboring Men's Association, a Turnverein, a Schuetzenbund, and Relief Park Association. Each of the last three above named have purchased and fitted up parks for physical improvement and social enjoyment. These parks cover an area of 17 acres in beautiful groves of native trees.

The grounds of the Washtenaw county agricultural society with suitable buildings are also within the city limits.

OTHER PROMINENT FEATURES.

Like some other towns of Michigan, Ann Arbor contains fountains of health in the shape of mineral springs, whose waters are highly impregnated with iron, sulphur, magnesia and other minerals.

The Toledo & Ann Arbor railroad is now doing a large business between those cities, affording another direct route to the centers of trade and commerce. The extension is expected to be completed to Pontiac and cars running in spring of 1881, which will afford connection with several railroads north.

This city especially prides itself on its large and handsome court house, erected at a cost of about $80,000.

The fire department consists of one steamer, three fire companies, and two first-class hand engines with 1,600 feet of hose, and a hook and ladder company. Small reservoirs in the central portion of the city have furnished the principal supply of water for fire purposes, but the University grounds have been supplied with water for all purposes from a neighboring spring, which furnishes an abundant supply and a large surplus. The water is conveyed through pipes into a reservoir having a capacity of 1,500 barrels, which stands on the University grounds adjoining the laboratory.

EDUCATIONAL.

The city is favored with the most efficient and prosperous union school in the state. Students in large numbers from this and other states attend the high school while preparing for admission to the University. The Ann Arbor high school furnishes yearly a much larger number of students to the University than any other institution of learning. In addition to the high school building, which alone cost about $60,000, there are five ward schools for the younger portion of resident pupils.

THE UNIVERSITY.

Ann Arbor is especially known as the seat of the University of Michigan, with its departments of Literature, Science and the Arts, the Medical, including the Old School of Medicine, the Homœopathic College and the Dental College, the Law department, its schools of Mining and Civil Engineering, and its extensive laboratory of Chemistry and Pharmacy. The several departments contain 1,427 students, 129 of whom are ladies, who are admitted into all the departments upon the same terms and conditions as gentlemen. In its complete and thorough courses of study, and in the number of students who annually flock here for thorough culture from every part of the world, and in the number and size of its buildings and extensive and beautiful grounds, this institution ranks among the first in the United States. Among the most recent and important additions to the University are the hospitals. The first building was erected in 1875 and the second in 1879, for public hospitals. They are fully equipped, and ample provision has now been made for patients from this and other States. There are accommodations for 200 patients. A cut of the University may be seen on the opposite page.

By her various railroad connections Ann Arbor is 38 miles west of Detroit, 37 east of Jackson, 74 southwest of Lansing, 40 southwest of Pontiac, 234 east of Chicago, and 46 northwest of Toledo. A tri-weekly stage runs to Whitmore Lake and Brighton; fare, 50 cents and $1 respectively. C. G. Clark, postmaster.

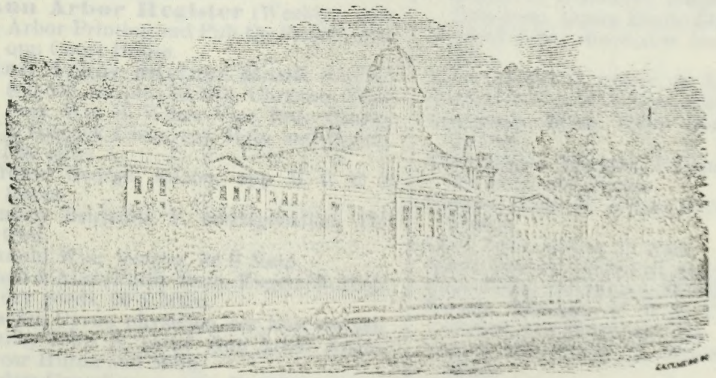
UNIVERSITY OF MICHIGAN

CONSISTS OF SIX DEPARTMENTS OR SCHOOLS.

The Department of Literature, Science, and the Arts; the Department of Medicine and Surgery; the Department of Law; the Homœopathic Medical College; the Dental School, and the School of Pharmacy.

Each department has its own faculty of instruction. In 1879-80, its officers of instruction numbered more than fifty; its students, 1,427. The department of Literature, Science and the Arts, has six regular courses, leading respectively to the degrees of Bachelor of Arts, Bachelor of Letters (Latin), Bachelor of Science, Civil Engineer, Mining Engineer, Bachelor of Letters (English). All the degrees and all the courses of studies, whether Classical, English or Scientific, receive equal attention, and no discrimination is made whatever in favor of either. About half of the studies in all the courses, save the engineering, are elective. If a student is able to complete his full course in less than four years, he is allowed to do so, and receive his degree. Each one is permitted to do all he can, and receives credit for his work. Students under twenty-one years of age, who are prepared to enter any regular course, may pursue select studies without taking a degree. Students who are at least twenty-one years of age, may enter without examination and pursue such studies as they desire, provided their previous education fits them to carry on work in the department. Post-graduate courses are provided for graduates of the University, or of any other collegiate institution. In the department of Medicine and Surgery, students matriculating in 1880, or afterwards, are required, in order to graduate, to attend lectures on three courses of nine months each.

In the Law Department, the candidates for graduation are required to attend two courses of lectures of six months each. A year's course in another law school, or one term's practice of law under a license from the highest court of general jurisdiction in any state, is accepted as an equivalent for the first year in this department. The degree of Bachelor of Laws from this school entitles the holder to an immediate license to practice in all the courts of Michigan.



In the Homœopathic Medical College, attendance on three courses of nine months each is a prerequisite to graduation. The students of both medical schools have the advantages of special training in a well-equipped physiological laboratory, and of clinical instruction in spacious and well-appointed hospitals, which the generosity of the State and the city of Ann Arbor have furnished. The Dental School affords the largest facilities for instruction. In addition to the lectures of the Dental Faculty, the lectures of the Medical Faculty are heard by the dental students, and superior clinical opportunities are also furnished. Attendance on two six months' courses is required for graduation. The student of Pharmacy has a thorough two years' course, mainly in Botany, Chemistry and Materia Medica; leading to the degree of Pharmaceutical Chemist. The splendid Chemical Laboratory, which has been doubled in capacity in the last year, has over 250 tables, the largest in the world, is open to the students in the various departments. The Museum of Science and Art is one of great value, and has been transferred to the new building erected this year. The Geological, Zoological and Botanical Cabinets are estimated to contain 255,000 specimens. The Museums of Anatomy and Materia Medica are also very large. The Astronomical Observatory, erected by citizens of Detroit, is thoroughly equipped, and has contributed largely to astronomical discoveries of late years.

The Libraries, accessible to students, number about 25,000 volumes. The University, with all these advantages, is a part of the public educational system of the State. Students of both sexes are admitted. The fees are as follows: To residents of Michigan, an admission fee of ten dollars, and the annual payment of twenty dollars; to those of other States or countries, an admission fee of twenty-five dollars, and the annual payment of twenty-five dollars. The prosperity of the University is unparalleled. It was not opened until 1842, yet only one or two institutions rival it in the number of its students, who come from nearly every State and Territory, and from several foreign lands.

AU SABLE.

(*See also Oscoda.*)

The settlement of this place was originally formed in 1849, and it became an incorporated village in 1872. It is located at the mouth of the Au Sable river, in Au Sable township, Iosco county, and is a port of entry. Vast forests of pine abound in the immediate neighborhood, and the village is the center of extensive lumber and timber interests, the shipments for 1879 aggregating sixty million feet of lumber and sixteen million lath, besides large quantities of timber, barrel stock, etc. Fruit, fish, salt and ice are also exported. Among the improvements here are 3 churches—Catholic, Episcopal and Presbyterian—a graded public school, with 4 teachers and 586 pupils, 2 public halls, 3 steam saw mills, 4 hotels and a fire department with 2 hand engines. Improved farms average $25 per acre; unimproved land $5 and upwards. Distance to Tawas City, the county seat, 15 miles, to Detroit 175. Population, 2,300. During the season of navigation shipments are made via Bay City. Stage communication daily during winter with Standish and Alpena; fare to each, $4. Telegraph, Western Union. Express, Holt's, from Bay City, McClure's, from Detroit. James E. Forrest, postmaster.

BATTLE CREEK.

The first city in size and importance in Calhoun county, is located at the confluence of Battle creek with the Kalamazoo river, and at the intersection of the main line of the M. C. with the C. & G. T. Ry. It is 13 miles west of Marshall, the county seat, 45 southwest of Lansing, 23 east of Kalamazoo, 121 west of Detroit and 163 from Chicago. A settlement was formed here about 1836, incorporated as a village in 1850 and nine years later as a city. The corporation is two miles square and is divided into four wards. The population now aggregates about 7,500.

Among the important features of the city are its manufacturing enterprises, the products of which embrace threshing machines, sash, doors, flour, lumber, leather, machinery, carriages and wagons, knit goods, etc. Three flour mills have a united capacity of 12 run of stones. Battle Creek is the headquarters of the Seventh Day Adventist denomination, who have here a college building costing $35,000, and a Sanitarium, where patients from all parts of the country are successfully treated; they also have a publishing house with a capital of $100,000, from which are issued a number of periodicals, besides books, pamphlets and tracts, printed in several different languages, and circulating in all parts of the world. The tabernacle of this denomination, erected in 1878 at a cost of $25,000, has the largest auditorium of any religious edifice in the state, being capable of comfortably seating 3,000 persons.

Banking facilities are afforded by the First National Bank, with a capital of $100,000, and the City Bank, capital $50,000. There are two first class hotels, the Lewis House and the Williams House. The public halls are the Opera House, Centennial Hall and the City Hall, seating respectively, 1,200, 1,000 and 500. The city boasts a public school library, containing 4,000 volumes, and a ladies' library of 1,500 volumes. The Central School building is one of the finest in the State, its cost being about $80,000, besides which there are three ward school buildings, costing in the aggregate $30,000.

The religious interests of the city are represented by nine or more churches, of which the more prominent are the Congregational, Adventist, Methodist, Baptist, Episcopal, Catholic and Dutch Reformed. The press is represented by one daily newspaper, the *Journal*, and three weeklies.

The city has a bonded indebtedness of $145,800, and the value of real estate and personal property as assessed for purposes of taxation, is, of the former, $1,868,510, and of the latter, $713,030. A large block is being erected on the site of the Potter House, recently burned, and over 200 residences have been constructed during the past year. The river and creek furnish a valuable water power, which is exten-

sively used by the various manufactories. The adjacent country is moderately undulating, with a rich, productive soil, wheat, oats, corn and grass being staples, while fruit of all kinds is largely grown. Wool also is a leading product. These, with flour and live stock, are largely exported. The American Express and Western Union Telegraph companies have offices. Stages run to Bedford daily; fare, 25 cents; and to Pine Creek and East Leroy Wednesday and Saturday; fare to either, 50 cents. Wm. Wallace, postmaster.

JONES' LIVER GRANULES

THE LEAST AND YET THE GREATEST.

These Granules are in the most concentrated form, entirely vegetable, and so carefully compounded as to combine in each small Granule as much *Cathartic* and *Tonic* power as is contained in the mammoth bolus of the old practice. They are pleasant to take, easy and painless in their operation, and leave no constitutional disturbances. They are Unsurpassed as a Remedy for Headache, Rheumatism, Bilious Attacks, Jaundice, Bad Taste in the Mouth, Pain in the Back and Kidneys.

Price 25 Cents per Bottle. | Manufactured by E. L. Jones & Co., Battle Creek, Mich. | For Sale by all Druggists.

MESSRS. E. L. JONES & CO. DETROIT, June 7th, 1880.

Dear Sirs:—Enclosed find 50 cents, for which please send me by mail two bottles of Jones' Liver Granules. I purchased a bottle some months ago, and find them a very valuable remedy for Biliousness and Dyspepsia. Yours truly, H. C. WILLIAMS.

BAY CITY.

The third city in population in the State of Michigan, the county seat of Bay county, and situated at the mouth of the Saginaw river, five miles from the bay of the same name. Was first settled in 1837, at which time it bore the name of Lower Saginaw and Portsmouth. During the years 1840–4, a number of wealthy men purchased considerable property in and near these towns, which they used for farming and stock raising. Two years later, the extinction of pine in the forests of the east, necessitated the establishment of stations for its manufacture in the west, and as near the forests as possible. The present site of Bay City was regarded as being a very desirable place for such a station, and Mr. James Fraser, in company with Mr. C. S. Pomeroy, in 1846, built a saw-mill on the site now occupied by Gates & Fay's mill, on South Water Street, and during the same year an old steam saw-mill in Portsmouth was repaired, and operations begun.

Thirteen years after (1859), Bay City was incorporated a village, with a population of 700 persons. These people were mostly engaged in fishing and lumbering, the former industry comprising a large share of the exports from the village. In 1860 the attention of capitalists was directed to the rich and vast deposits of salt in the vicinity, and a salt well was sunk within the limits of the new village, the absolute success of which very speedily developed interests that have, in 1880, led to the production of 450,000 barrels of salt in Bay City.

The lumber and salt interests, furthered

by the hearty co-operation of business men, induced a growth in wealth and population such as has been equaled only by two towns in the United States—Denver and Minneapolis. The sinking of salt wells and the construction of saw-mills was prosecuted with rapidity; the village grew apace, and in the spring of 1865, received its city charter, being divided into three wards, with a total population of about 3,000, and a valuation of city property of $633,000. A number of improvements were made in the fire department and sewerage this year.

Bay City, to-day, has about six miles of water front and six times more territory, with an average depth of one and a half miles, more than the village of Bay City did, as laid out in 1837. The streets running east and west are numbered from one to forty-three, while those running north and south, above Water and Saginaw, are designated by the names of the presidents from Washington to Van Buren. The streets are laid out to form regular blocks, and are in excellent condition. About three miles of street paving has been done in the streets over which there is the most traffic. The Bay City street railway is laid through Water street, and runs cars from South Bay City to Essexville, a distance of fully five miles.

The city is connected with three railways, which render incalculable benefit. The Flint & Pere Marquette railway connects the city with Detroit via Flint. The Detroit & Bay City railroad is the short route to Detroit, and takes in all of the small towns on the line of Lapeer. The Jackson, Lansing & Saginaw railroad connects the city with the capital and Chicago, while the Northern Division brings the business of Roscommon and neighboring towns to the city. Before the present year passes the northern extension will have opened to Bay City the business of the Straits of Mackinac, the Government Park on the island of Mackinac as a pleasure resort, and the vast trade of the Lake Superior mining regions. During the past year the freight and passenger traffic over these roads have been very large. The F. & P. M. Co. has just made some handsome additions to its rolling stock, which will greatly increase the popularity of the road.

Bay City's religious interests are upheld by seventeen societies, almost the entire number having church edifices. The larger number of the people are Roman Catholics, representing five churches; Methodist Episcopal, two churches; Presbyterian, two; Protestant Episcopal, one; Baptist, two; Hebrew Synagogue, one; Lutheran, one; Congregational, one; Universalist, one. Many of these churches are what may well be termed handsome and commodious, the Baptist church approaching the elegant. This church was built in the years of 1872–3, at a cost of $80,000, and is free from debt. Each of the denominations is in a flourishing condition, presided over by zealous and energetic pastors, and maintain large Sabbath schools, with excellent libraries.

The school system is one of which the citizens may well feel proud, and under the efficient management of the Board of Education, which was incorporated in 1867, assisted by Prof. Morley, one of the best instructors in Michigan, the system is improved and worked to greater advantage each year. The rapid growth of the city and the multiplication of children rendered some very excellent system advisable, and it was under the able administration of Prof. D. C. Scoville that such a system was introduced, hence he is generally looked upon as the father of its development. The studies pursued are such as will fit the boy or girl for all practical purposes of life, or for the higher schools and colleges. The school edifices are models of neatness and excellent planning. The apparatus for heating them is of the best manufacture and design; the ventilation is after the most approved idea, and the general health and comfort of the pupils are provided for. Families settling in the city may rest assured that the education of their children will be well looked after. The number of pupils enrolled is 2,800, and the teachers number 47.

Bay City can lay claim to a large and well selected public library, under the management of the Board of Education, containing between 7,000 and 8,000 volumes on all subjects, to which is annexed a reading room. The management of this library is most excellent, and affords the poorest of persons an opportunity to glean knowledge on any subject, without cost, save by fines imposed for the loss of a card or the mutilation of a book. The most obliging librarians are in attendance, and the selection of books is made by the managers, consisting of gentlemen well versed in the school of books and authors.

City one of the very largest on the lakes. The exports are principally lumber and salt, which, with many other articles, are shipped by rail. The average weekly shipment of lumber from the port, by water, is 11,000,000 feet; shingles, 8,000,000; lath, 2,000,000. Millions of staves and hoops are shipped to Buffalo each year by the propellers Passaic and Music. The shipment of salt to Chicago, Milwaukee and Duluth is carried on by the Commercial line of steamers, five in number, averaging about 7,000 barrels each trip. The smaller freight is carried up along the shore by the Bay City and Alpena line of passenger and freight steamers, a line of small propellers plying between Bay City, Sebewaing, Caseville and neighboring towns; the Grace Grummond to Oscoda. Bay City is connected with the Saginaws by a line of steamers, making a number of trips a day each way. The imports by water are not at all large, consisting mostly of coal, stone and sundries; the larger number of vessels arrive in port light.

The past year has borne witness to a renewed activity in vessel building. Two large propellers for the Anchor Line, 1,600 tons, and costing $100,000 each, were built by Wheeler & Son, who also launched a tug costing $12,000. A propeller, two tugs and a barge were built at the Bay City Dry Dock, and a canal boat at a spot near the Twenty-third street bridge. In the autumn of 1880, the frames for three large propellers were constructed, all of which will probably be launched soon after the opening of navigation. Vessel builders think this year will serve them unusually well.

Bay City can boast of some very handsome and substantia buildings, among which are the Opera House, seating 1,200, First National Bank, Fraser House, Union Block, Watson Block, Cranage Block, and the new Shearer Block, the last of which was built during the year 1880, at an estimated cost of $60,000. The city is nicely lighted with gas, and supplied with the Holly Water Works, pumping water from the Saginaw bay. The fire department does excellent service, being always on hand at the shortest notice. The fire alarm telegraph connects the ward hose houses with the most considerable portion of the city, and since this very efficient system has been in use but few fires have destroyed property of much value. The sewerage of the city is much better than thousands of other cities, and is being improved each year. One of the best orders of the Council last year was for the construction of brick sewers in Fifth and Sixth streets.

Last year was one of general improvement in the city, and a vast amount of building was done. The demand for houses by the many families moving into the city necessitated the outlay of capital in the construction of tenement houses, and many of the business men erected handsome private residences. The total cost of the buildings and improvements may be set at $350,000. According to the comptroller's report, in March, 1880, the bonded indebtedness of the city was $416,000, but several thousands of dollars have been paid during the year, which will place the figures at about $400,000. The population of the city, according to the late census, was 20,638, and the assessed valuation of real property $5,995,610; of personal $1,726,700, making a total of $7,722,310. The postoffice is under the management of F. W. Dunham, T. J. Cooper is manager of the Western Union Telegraph office, and E. B. Watkins of the American Express office. George A. Grant has charge of the Michigan Central and Detroit & Bay City passenger departments, and G. D. Ewing of the freight. The agency of the F. & P. M. railway is held by A. Patriarche. Branch freight and ticket offices are located in the business portion of the city.

There is not a city in the Union that possesses a better location or facilities for manufacturing than Bay City, and its rapid and healthy growth goes to substantiate these claims. Until within the last few years the great industries of lumber and salt manufacturing have rather shrouded the lesser occupations, but each year brings other manufactories forward to increase the wealth and population of the city. The river is now lined with mills and factories of all kinds, and many have penetrated into the interior of the city. The advantages of shipment by land or water which Bay City offers, should be investigated by capitalists and manufacturers who are desirous of investing or settling in a place where their money may soon be doubled, or their factories prove successes. The agricultural interests of the vicinity are beginning to assume a very favorable aspect. Some of the best grain ever raised has been harvested within the city, and mill men state that it makes the best of

flour. Nature has given Bay City the natural advantages to become a large and wealthy city, and it only requires the hearty co-operation of her citizens and the emigration of such as desire to find a good home or lucrative situations, to make her one of the foremost cities on the great lakes.

BENTON HARBOR.

Is a thriving village of 2,000 inhabitants, located at the confluence of the Paw Paw and St. Joseph rivers, about one mile east of St. Joseph, on Lake Michigan. It is the center of the great fruit growing district, and the most important fruit shipping point on the lake. About 350,000 packages of fruit, 6,000,000 feet of lumber, 3,500,000 staves, and 100,000 miscellaneous packages, are annually shipped. The village is situated in Benton township, Berrien county, and is on the C. & W. M. R. R., 16 miles northwest of Berrien Springs, the county seat, 30 north of New Buffalo and 60 by water or 100 by rail from Chicago. The neighboring country embraces one of the most productive and densely populated portions of the State, abounding in excellent timber for building or manufacturing purposes. There are four handsome churches, representing the Baptist, Methodist, Universalist and Congregational denominations, a fine Union school building, a good weekly newspaper, the *Expositor* (Democratic), established September, 1880, a library of 350 books, and a steam fire engine. A ship canal a mile long, extending from the center of town to the St. Joseph river, built at a cost of $50,000, and other public works, are evidences of the enterprise and culture of the citizens. Telegraph, Western Union. Express, American. Two or more steamboats run to Chicago daily during the season of navigation. A. B. Riford, postmaster.

BIG RAPIDS.

The capital of Mecosta county, located on the Muskegon river, one of the most important lumbering streams in the State, is 185 miles northwest of Detroit, 56 north of Grand Rapids, and 98 northwest of Lansing. The first settlement here was made about 1855, the village was platted in 1859, and became incorporated as a city in 1869. Its railroads are the Grand Rapids & Indiana, the Big Rapids Branch Chicago & West Michigan extending from here to Muskegon, where it joins the main line, and the Stanton Branch Detroit, Lansing & Northern, completed to this point in 1880. Lumber in its various forms is largely manufactured and exported, there being in operation here 3 saw-mills, 1 shingle mill, 1 clap-board and shingle mill, 1 sash, door and blind factory, 2 planing mills, 1 picture backing manufactory, the largest in the world, and a handle factory. There is also an extensive furniture factory, a flour mill, 2 foundries and machine shops, a boiler shop, a tannery and a brewery. The river furnishes a first-class water power here, which is used by about half of the above named establishments.

Big Rapids has Catholic, Congregational, Dutch Reformed, Episcopal, Methodist, Presbyterian and Swedish Lutheran churches, and an efficient public school system. Among the institutions of the place may be mentioned 2 banks, the Northern National, capital $90,000, and the banking house of F. Fairman, Esq. Three weekly newspapers, the *Pioneer-Magnet* and the *Current*, Rep., and the *Herald*, Dem.; the Holly system of water works, erected in 1871, at a cost of $65,000, a spacious and handsome opera house, a telephone exchange, and a ladies' library association, having over 600 volumes. The city is steadily improving, quite a number of brick blocks having lately been put up in the business portion of the town, with others in course of construction. Trade in all departments is brisk and constantly increasing. Bonded debt, $59,000. Population about 4,000. Express, American and United States. Telegraph, Western Union and G. R. & I. R. R. Co's Line, in connection with the Atlantic & Pacific.

BROOKLYN.

Is situated on the D., H. & S. W. R. R., in Columbia township, Jackson county, 15 miles southeast of Jackson, the county seat, 35 southwest of Ypsilanti, and 65 from Detroit. It was settled in 1836, incorporated a village in 1879, and has a population of 600. The River Raisin, which has its source near the village, furnishes an extensive water power, operating flour and lumber mills. Among the more important features of the place are a foundry and machine shop, a commodious school building, Baptist, Episcopal and Presbyterian churches, a bank and a fine brick business block. The leading exports are wheat, clover seed, wool, live stock, pork, poultry, butter and eggs. Stage to Napoleon daily, fare, 25 cents, and to Tecumseh, Monday, Wednesday and Friday, fare, $1. Express, American. Telegraph, Western Union. Hiel Woodward, postmaster.

BUCHANAN.

A prominent manufacturing town on the M. C. R. R., in the township of Buchanan, southeastern part of Berrien county, was platted in the spring of 1837, and incorporated as a village in 1858. It is located at the confluence of McCoy creek and the St. Joseph river, whence excellent water power is derived, and, to some extent, utilized, 2 flouring mills and a furniture factory being operated by it. The other manufactories are 4 or more in furniture (this being a branch of industry for which Buchanan is specially noted), 1 plow factory, 2 lumber mills, a zinc collar pad factory, a brick yard, a foundry, a cider mill, a large carriage and wagon works, and others of minor importance. There are 6 churches—2 Adventist, Christian, Methodist, Presbyterian and United Brethren—and a very fine public school building, which cost $40,000. The First National Bank was organized in 1872, with a cash capital of $50,000 and a liberal surplus. The aggregate business done by this institution annually is over $6,000,000. Many of the private residences are models of elegance and refined taste. The *Buchanan Reporter* and the *Berrien County Record* are published weekly, the latter by John G. Holmes. The village has a neat opera house, a township library of about 800 volumes, and a good hotel, the Dunbar House. The surrounding country comprises some of the most productive farming land to be found in the state, and produces every class of farm products, including berries and fruit. The exports are largely composed of furniture, lumber, flour, fruit, live stock and grain. The M. C. R. R. and connections afford direct communication with Kalamazoo, distant 47 miles, Jackson 121, Detroit 197, Chicago, Ill., 87, and South Bend, Ind., 17 miles. The population of the township, according to the recent census, is 2,900. Telegraph, Western Union. Express, American. L. P. Alexander, postmaster.

CADILLAC.

The city of Cadillac is located 98 miles north of Grand Rapids, on the G. R. & I. R. R., in the southeasterly part of Wexford county, at the foot of Little Clam Lake, which, with Big Clam Lake, to which it is connected by a canal, lie west of the city, and afford floatage for lumbering business. This place was first settled in the fall of 1871, previous to which time it was the heart of an unbroken wilderness, surrounded with pine forests, interspersed with much valuable hard wood timber.

The late Hon. George A. Mitchell was one of the founders of the place, who, with O. A. Simons and C. E. Gorham, of Fort Wayne, purchased a large tract of land in the county, and by his liberal and public-spirited course gave the town a rapid growth and solid basis, in all things looking to the general welfare more than the building up of private monopoly. His untimely death, in August, 1878, was a serious loss to the city.

The place was first incorporated as the village of Clam Lake in May, 1874, and had, by the census of that year, a population, including the township, of 1,046. In March, 1877, it was incorporated as the city of Cadillac, taking its name from De La Motte Cadillac, the French commandant who, while in command at Mackinaw in 1694, conceived the plan of founding a permanent settlement at Detroit, which he carried out in 1701, and was the first post

founded on the lower peninsula. The population of Cadillac, by the census of 1880, is nearly 3,000, and probably is considerably larger at the present time.

Water Works were completed and put in operation in September, 1878, furnishing an ample supply of pure, soft water for private and public uses. The city is out of debt and growing rapidly, and is the center of the lumbering interest of northern Michigan. Over 100,000,000 feet of lumber were shipped in 1880, and immense amounts of supplies furnished to the numerous lumber camps in Wexford and Missaukee counties. The receipts of the G. R. & I. R. R. at this point are larger than at any other station on its entire line, and comprise one-fourth of all the freight business north of Grand Rapids.

There are five churches—Presbyterian, Methodist Episcopal, Lutheran, Catholic and Free Methodist—and a graded school, with 7 teachers and upwards of 600 pupils.

Of Masons there is a strong and prosperous lodge and chapter, also Odd Fellows, Knights of Honor and Good Templars, and 4 first-class hotels, all doing a heavy business.

The postoffice, under the efficient management of Jared H. Hixson, shows the following figures for 1880:

Receipts from stamp sales, etc.	$4,458 22
Receipts from box rents	518 40
Total	$4,976 62

The business of the postoffice has actually doubled in 2 years. Express, United States. Telegraph, G. R. & I. R. R. Co.'s line.

CALUMET.

An important mining village located on the Keweenaw peninsula, in Calumet township, Houghton county. It is at the site of the famous Calumet & Hecla copper mine, 5 miles back from the shore of Lake Superior, and 13 northeast of Houghton Court House. The township has a population of 8,300, including 2,200 in Red Jacket. Calumet is reached from Hancock by the Mineral Range railroad, being 12 miles distant. Another railroad, 5½ miles long, belonging to the mining company, connects it with Torch Lake. It is regularly laid out with straight, wide streets, and the buildings, mostly of wood, are neat and attractive. For so large a place there are but few stores, shops or factories. There are six churches—Catholic, Congregational, Finnish, Lutheran, Methodist and Scandinavian—and a large and handsome Union school of brick and stone, capable of accommodating some 1,200 children, has been erected by the munificence of the mining company. There are also several smaller schools in the vicinity.

The mine, one of the richest in the world, is worked in a vein of conglomerate, dipping to the west at an angle of perhaps 38 deg. The vein is eight or ten feet in thickness, and is uniformly productive. Eight

shafts penetrate the vein to a depth of some 2,000 feet, the different shafts being connected by galleries or levels. Work is prosecuted night and day, and about 2,000 hands are employed. The machinery used for elevating the ore to the surface and crushing it, and for pumping and condensing air for the drills, is all on an immense scale and of the most perfect description. The rock is carried by rail to Torch Lake, where are located the extensive stamps of the company.

CARO.

The county seat of Tuscola county, is situated on the Cass river, in Indian Field township, near the center of the county. It is an incorporated village of 1,600 population, and the center of an extensive lumber traffic. The Caro Br. of the D. & B. C. R. R., connecting with the main line at Vassar, 13 miles southwest, terminates here. By this line three trains arrive and depart daily. The county buildings are built of brick and stone and are of a handsome and substantial character. There are 8 religious organizations, having 4 church edifices, with 2 others under contract. An opera house with a seating capacity of 600; 3 centrally located and well-managed hotels, the Caro House being first class. There are some fine brick business blocks, over one hundred and fifty places of business, including stores, offices and shops and one of the best graded schools to be found in the state. Three newspapers are published, the *Advertiser*, established in 1868; the *Citizen*, founded 1879, and the *Jeffersonian*, first issued in 1880. Three grain elevators, 2 banks, 3 flouring mills, 2 foundries, 4 planing mills, 2 saw-mills, 1 brick yard, etc. Caro is the shipping point for about one-half of Tuscola county, and it has a large trade with portions of Huron and Sanilac. Stage lines daily to Sebewaing with mail and express, and to Ellington, Gagetown, Elmwood, Cass City and Bad Axe, tri-weekly. Caro was settled in 1867. It has good water power and is surrounded by a fine agricultural country, producing all the grains and root crops. Distance (by rail) to Bay City, 32 miles, to Detroit, 100, to Sebewaing, 22, and to Lapeer, 39. Telegraph, Western Union. Express, American. Mail, daily. Farley Cran, postmaster.

CASSOPOLIS.

Is located in La Grange township, near the center of Cass county, of which it is the seat of justice. It is a flourishing village of about 1,000 inhabitants, dating its settlement from 1829. It was made the county seat in 1832, when it contained a population of about 300, and grew very slowly until 1870, when the Air Line Div. M. C. R. R. was opened through the county. It now has excellent facilities for reaching the markets east and west, being located at the intersection of the Air Line Div. of the M. C. and the C. & G. T. lines. It is 14 miles east of Niles, 37 southwest of Kalamazoo and 89 west of Jackson. It has no water power, though there is an abundance of water near by, the village being located just on the bank of Stone lake, and only one mile west of a beautiful sheet of water known as Diamond lake. In the center of this lake is a cosy little island, a favorite locality for picnics, etc. The churches are 3—Baptist, Methodist and Presbyterian. These, with a good wooden Union school house and the county buildings, embracing a wooden Court House, a brick jail and fire-proof offices, constitute the public buildings. Two weekly newspapers are published here—the *National Democrat* and the *Vigilant*. Telegraph, Western Union. Express, American. Mail, from all points, daily. C. Carroll Nelson, postmaster.

CHARLEVOIX.

The justice seat of Charlevoix county, is situated on the shore of lake Michigan at the entrance to Pine lake, and is a port of entry. It is 60 miles north of Traverse City and 16 southwest of Petoskey, its nearest railroad approach. The settlement was formed in 1866 and incorporated a village in 1879. Population, according to recent census, 550. The mouth of Pine river forms an excellent harbor, the government having expended large sums for its improvement. Vessels drawing 19 feet of water can pass into and through to Pine lake. A signal station is located at the entrance to the harbor. A large shipping trade is done in wood, bark, ties, cedar posts, lumber and fish, the exports in 1880 aggregating 700,000 tons. Among the features here are a weekly newspaper, the *Sentinel*, Methodist, Baptist and Congregational societies, a good hotel, and one or more saw-mills. The beautiful location of the village and the many attractive features it possesses as a summer resort, have made it extremely popular with tourists. During the season of navigation, steamers of Chicago and Buffalo lines touch here several times a week, and a boat runs to Boyne City daily. Stage to Petoskey daily; fare, $1; to Elk Rapids tri-weekly, fare $1.50. Telegraph, Western Union. Mail, daily. Willard A. Smith, postmaster.

CHARLOTTE.

Is situated 2 miles south of the geographical center of the county of Eaton, of which it is the seat of justice. The site was originally a level prairie, dotted with burr oaks and surrounded by heavily timbered lands. The first settlement was made in 1839, and in 1863, when the place contained 817 inhabitants, it became an incorporated village. In 1871 a city charter was obtained, the population then being 2,300. According to the census of 1880 it contains 3,000 inhabitants. The Grand Rapids Div. M. C. R. R. crosses the C. & G. T. Ry at this point, affording competition in traffic both east and west. By these lines it is 19 miles southwest of Lansing, 35 northwest of Jackson, 59 southeast of Grand Rapids, and 104 west of Detroit. No finer stores are to be found in any city of its size in the west, and its business men are live, active and thriving.

Charlotte has 3 excellent hotels, an opera house, seating 800, 2 banks, 2 newspapers —the *Republican* and *Leader*—5 churches, excellent school buildings, and some fine residences. It has also a valuable public circulating library, of about 1,500 volumes, managed by an efficient board of directors, and generously patronized by the people. The city has a bonded debt of $15,400 in railroad bonds and $4,000 in school bonds, and an assessed valuation of $1,360,225, which is full value.

The Eaton County Agricultural Society grounds are within the limits. They are nicely arranged, and one of their most marked features is a grove of about ten acres, through one corner of which flows Battle creek. The county jail, situated here, is the admiration of all who see it.

During 1871 many public improvements were made, and the like have steadily increased to the present time. It has a steam fire department, and one of Silsby's third size engines, and one of the most expensively uniformed and well trained cornet bands in the State.

No healthier place can be found, and its inhabitants are moral and cultivated. Mail stage to Kalamo tri-weekly; fare, 50 cents.

The Western Union Telegraph and American Express furnish telegraph and express facilities. F. E. Leiter, postmaster.

CHEBOYGAN.

This flourishing village, the county seat of Cheboygan county, is located within about 18 miles of the extreme northern point of the lower peninsula of Michigan. It is at the mouth of the Cheboygan river, on what is known as McLeod's bay, and has a good harbor and steamboat dock. The river is spanned by a draw-bridge, and by slack water, by means of a lock having a rise of 10 feet, is made navigable for over 30 miles, connecting Mullet and Burt lakes with the Straits of Mackinac. It will be the nothern terminus of the Mackinaw Div. of the M. C. R. R., which is expected to reach this point during the summer of the present year (1881). The completion of this road will add greatly to the growth and importance of the place, and it will, no doubt, become one of the most prominent points on the northern shore of the lower peninsula. The first settlement was made here in 1846, and the place incorporated in 1871. Present population about 2,500. It has 6 saw-mills, cutting annually 50,000,000 feet of lumber. There are 4 handsome churches, a $10,000 Union school building, 5 hotels and one weekly newspaper, the *Northern Tribune*. Lumber, lath, shingles, broom handles and fish are shipped. Telegraph, Western Union. Express, McClure & Co.'s. A line of stages run to Petoskey daily, and to Mackinac City tri-weekly. Fare, $2.50 and $2, respectively. During the season of navi-

CHELSEA.

Which, according to the recent census, has a population of 1,300, was incorporated as a village in 1861, and is located on the M. C. R. R., in the township of Sylvan, Washtenaw county, 18 miles west of Ann Arbor, 21 east of Jackson, and 56 west of Detroit. The country tributary to Chelsea is very fertile, and is one of the surest wheat raising districts in the State, the soil being composed of a light sandy loam, combined with clay. The value of improved farms ranges from $60 to $80 per acre. The principal products and shipments are cereals, wool, fruits and berries. The place has no water power and but little manufacturing; it has churches representing the Baptist, Catholic, Congregational, Lutheran and Methodist denominations, a graded public school with 7 teachers and 350 pupils, and a weekly newspaper, *The Herald*. Assessed value of real and personal property, $500,000. Express, American. Telegraph, Western Union. Stage communication triweekly with Unadilla, fare 75 cents, and Stockbridge, fare $1.00. Mail, daily. George J. Crowell, postmaster.

COLDWATER.

The seat of justice of Branch county and one of the mort important cities in the southern part of the State, lies on the main line of the L. S. & M. S. Ry. 132 miles by rail or 100 miles in a direct line southwest of Detroit, 43 by rail southwest of Jackson and 65 from Lansing. The name is a literal interpretation of the original Indian word applied to the beautiful group of lakes in the vicinity and upon a connecting stream between two of which the town stands. The first house was erected here in 1829 and a village laid out in 1832 and incorporated in 1837. The L. S. & M. S. Ry was completed to this point in 1851 and it became the county seat the same year. A city charter was received, in 1861, and the population according to the census of 1880 is 4,708. The city is located in the midst of a rich prairie country. The streets are broad and run at right angles. Many of the residences are stately and all are comfortable and home-like, and evidences of intelligence and prosperity are everywhere manifest. Among the prominent features of the city are its churches, of which there are 7, Baptist, Methodist Episcopal, Wesleyan Methodist, Catholic, Presbyterian, Episcopal and Lutheran. There are 3 public schools with 22 teachers and 1,043 pupils. The State Public School located here, with accommodations for 300 pupils, was opened May 21st, 1874. The buildings are all of brick, situated at northern limits of the city, heated by steam and lighted by gas brought from the city works. Total cost, $177,000. There are 2 National banks, 2 large public halls, an art gallery, 3 libraries, having a total of 5,500 volumes, 3 newspapers, several good hotels and a number of manufacturing enterprises. The total assessed valuation of property, real and personal, is $2,252,580, and the city is free from debt. 11,176 tons of freight were shipped in 1879 and 10,345 tons received. Building improvements to the extent of $100,000 have been recently made here. Coldwater has stage communications with Union City, Girard and Orangeville, daily; with Fremont, Ind., and Kinderhook, tri-weekly, and with East Gilead and Bethel, semi-weekly. Telegraph, Western Union. Express, United States. Mail, daily. Julius S. Barker, postmaster.

CONSTANTINE.

One of the oldest villages in the southern part of the State, is located on the banks of the St. Joseph river, in the southwestern part of St. Joseph county. The Fawn river here unites with the St. Joseph, the two forming one of the most extensive water powers in the State. This is utilized by 3 flouring mills, 1 saw-mill, 1 paper mill, 1 iron foundry, 1 sash and blind factory and others. There are 4 churches, Methodist, Presbyterian, Lutheran and American Reform (two of these are of recent construction, and are models of elegance), a graded public school, with 7 teachers and 450 scholars, a fine library of some 800 volumes, a public hall seating 500, water works on the Holly system, 2 good hotels, 2 National banks, with a capital of over $100,000. A number of fine business blocks and handsome residences have recently been constructed, and the largest single-span iron bridge in the State crosses the river here. The *Advertiser and Mercury* (Republican) is published weekly, and is the only newspaper in the place. The village has a bonded debt of $3,626, and property real and personal assessed at $726,450. The total receipts of freight by rail for 1879 were 5,835,548 lbs, and the shipments, consisting of flour, grain, paper, live stock, etc., were 7,855,245 lbs.

Constantine was first settled in 1828, and incorporated a village in 1861. It now has a population of 1,542. The municipal affairs are in the hands of a president, treasurer, recorder and marshal, elected in May of each year. Distance to White Pigeon 4 miles, to Three Rivers 8 miles, to Centreville, the county seat, 10 miles, and to Detroit 150 miles. Express, United States. Telegraph, Western Union. Mail, daily. DETROIT.

The city of Detroit is the commercial metropolis of Michigan, and is much the largest city in the State. It is situated in Wayne county (of which it is the county seat), on the bank of the Detroit river, which forms a part of the Canadian frontier. Through this strait passes the vast tonnage of the great lakes, which, in volume, exceeds the entire foreign commerce of the country. The river here is five-eighths of a mile wide, and is everywhere navigable by the largest craft, and affords the city a magnificent water front miles in extent. This fine location, at the only point between lakes Erie and St. Clair suitable for a large harbor, made the place from earliest times an important point in the traffic of the region, has been the key to its steady and substantial advancement, and affords a sure guarantee of its future vastly-increasing progress.

CHARACTERISTICS OF THE CITY.

The flow of the Detroit river, at this point, is to the southwest, and the city lies on its western bank, stretching, including suburbs, nearly 10 miles. The city proper has a water front of 6 miles and a width of 3½ miles, and for 2 miles from the river is closely built up.

The city rises gradually from the river to the northern and western limits, where there is an elevation of 40 to 55 feet from the water's edge, thus allowing perfect sewerage and insuring clean and wholesome streets.

The river itself is the pride of the residents, and is the delight of tourists, who pronounce it one of the handsomest streams in the world. In the channel opposite the upper portion of the city is the beautiful Belle Isle, now owned by the municipality, and being laid out as a public park, while below the city there are numerous islands which are the resort of excursion parties; while the largest—Grosse Isle—is a very popular summer residence. These features make Detroit one of the most attractive cities of the North, and have contributed greatly to its growing popularity as a summer resort for people from the South. But it is

DETROIT AS A BUSINESS PLACE

that chiefly interests the readers of this work. In some lines of trade it is the leading city of the Northwest. We first mention its

MARINE INTERESTS.

The enrollment in this district shows the total number of vessels of all grades owned here are 290, having a tonnage of 70,096.71. Eight vessels were temporarily enrolled here, swelling the aggregate tonnage to 70,353.16. This represents an increase of 30 craft during the year, and some of them are noted for size and cost.

During 1880 vessels entered and cleared from this district, for coastwise trade, as follows:

	Vessels.	Tonnage.
Entered	2,586	922,342
Cleared	2,810	973,708

From and to Canadian ports as follows:

	U. S. Vessels.	Tonnage.
Entered	758	73,558
Cleared	789	86,553

Detroit Mutual Benefit Association, 143 Griswold Street. All Certificates mature in 10 to 26 years from date.

FURNITURE, MILLS & BARKER, 176 and 178 Woodward Ave., wholesale and retail, Feathers, MATTRESSES, Lounges, SPRING BEDS.

	Canadian Vessels.	Tonnage.
Entered	2,227	182,588
Cleared	2,226	180,303

Besides the shipping actually owned here, Detroit people are interested in various transportation lines touching at this port, and the aggregate amount of capital invested in this interest is very great.

SHIP BUILDING

Is a prominent industry in Detroit. The Detroit Dry Dock Company runs a yard in the city and one at Wyandotte; has $300,000 capital invested; employs 500 hands; pays $300,000 wages yearly; and the probable value of its products this year will be $1,200,000. At Wyandotte iron ships are principally built.

DETROIT'S RAILROAD SYSTEM

Next claims attention. The city is a prominent point on the "Vanderbilt lines" and the Grand Trunk Railway, and as this work is passing through the press, the Detroit, Butler & St. Louis Railroad is being completed, making the place a terminal point of the great Wabash system of roads, and giving it all the advantages of competition that have been hitherto enjoyed by the most favored cities.

Several important lines of road which cross the entire State center in Detroit, and the city is the distributing point for much of the grain and produce raised in the State. The Marquette & Mackinac Railroad (now in process of construction) is essentially a Detroit enterprise, and as it will connect at the Straits of Mackinac with the railroad system of the Lower Peninsula, it will send a large share of the traffic of the Upper Peninsula and of the Northern Pacific Railroad to this city, to be distributed in a southerly and easterly direction. The survey for another railroad, the Detroit & Mt. Clemens (narrow gauge), is now being proceeded with, and an early date will no doubt witness its completion.

Detroit is therefore in close and quick connection with every part of the State, and its business relations with the interior become every year closer and of more and more importance.

MANUFACTURING INTERESTS.

With the development of its railroad system has grown up manufacturing interests of the largest character. About 825 establishments of all grades are enrolled, with a capital of nearly $20,000,000, and a yearly product of nearly $30,000,000, and employing nearly 20,000 hands. Space allows us to enumerate but a few of the leading branches.

BOOTS AND SHOES.

Estimated capital, $329,290; hands employed, 986; annual product, $1,108,225. This is rapidly becoming one of the leading industries of the place. Machine-made goods are principally manufactured.

ENGINES AND BOILERS.

Capital, $748,650; hands employed, 808; product, $964,655.

MATCHES.

Capital, $260,000; hands employed, 375; product, $237,500.

TOBACCO AND CIGARS.

Capital, $1,060,700; hands employed, 1,521; product, $2,411,216.

GLASS.

Detroit possesses the only glass factory on the great lakes; located at Delray, just below the city.

STOVES.

There are two very large stove works. The Detroit Stove Works has $500,000 capital, employs 800 hands, pays $300,000 wages, and turns out $700,000 worth of stoves yearly. The Michigan Stove Company has $600,000 capital, employs 800 hands, and pays $300,000 wages yearly, and this year will turn out about $800,000 worth of goods. The product of these works is first class, and Detroit stoves are becoming famous the world over.

IRON.

The proximity of the city to the Lake Superior iron regions makes it a favorable point for iron working. During 1880 the receipts of iron were 24,034 tons; the shipments were 17,532 tons.

PORK PACKING.

In this industry $526,000 capital is invested, 257 hands are employed, and the yearly product is $1,789,731.

SEEDS.

Detroit has the largest seed house in the world, that of D. M. Ferry & Co.; capital, $750,000; hands employed, 596; yearly product, $1,194,066.

Many other industries occupying a prominent position in Detroit might be mentioned, but the above will give a good idea of the extent of its manufactories.

During the past year several manufacturing establishments of unusual size and capacity were inaugurated, including one for the manufacture of glucose from corn. These works have a capacity of 4,000 bushels of corn per day, producing 200 barrels of glucose, and it is estimated that the

Foresight is the right eye of Providence, and Providence dictates LIFE INSURANCE. Insure in the WASHINGTON

gross product of all the manufactories of the city for the current year will be at least $50,000,000.

THE GRAIN TRADE

of Detroit is one of its leading interests. The city has always occupied an enviable position as a wheat market, but insufficient elevator facilities have greatly hindered her development in this respect. There are three elevators, with a bin capacity of 1,595,000 bushels.

While these pages are being prepared, an agitation for a new elevator is going on, with some prospect of success. Detroit has, however, handled a larger quantity of wheat, in proportion to her elevator facilities, than any other grain center.

The receipts and shipments of wheat during 1880 were:

	Receipts.	Shipments.
By rail (bushels)	9,938,960	1,809,139
By lake, etc. (bushels)	225,000	7,861,541
	10,163,960	9,670,780

FLOUR.

During 1880 the local production of flour was about 170,000 barrels, from eight mills, with an aggregate run of 44 stone—the largest being the Union Mill, with 18 stone. The arrivals of flour for the same period aggregated 341,187 barrels. Adding local production to receipts, there was handled in this market during the year about 511,000 barrels. The shipments for 1880 were 180,976 barrels.

COARSE GRAINS.

Detroit handles a respectable quantity of coarse grains, especially corn and oats; and it is believed will occupy a commanding position in this respect, when the new Detroit, Butler & St. Louis road is finished, and leads to the great grain fields of the southwest.

A GENERAL VIEW

of the receipts and shipments of leading lines of produce for 1880 is afforded by the following table:

THE BUSINESS INTERESTS

Of the city are fostered by the Board of Trade (org. in 1856), and the Merchants and Manufacturers Exchange (org. in 1878).

THE MUNICIPAL GOVERNMENT

Of Detroit has been fully described in previous editions of this work. We may say that it is one of the best governed cities in the country. The rate of taxation is not high for a growing city, its finances are well managed, and its credit is exceptionally good, the rate of living is low, and all these, in addition to its noble river, wide avenues and cleanly streets, make it a very desirable place to live and do business in.

CITY FINANCES.

Valuation of real estate, 1880	$64,556,085
" personal " "	19,807,750
Total	$84,363,835
Increase of valuation over 1879,	$1,165,745
Tax levy of 1880 yielded	$907,427 75
Percentage of tax	01,281
Debt of city, gross	$1,380,400
" water commission	1,503,000
Total	$2,883,400
Debt of city, gross	$1,380,400
Sinking fund to pay same	611,506
Net debt of city	$768,894

CORPORATE PROPERTY.

The city owns in public buildings, school houses, lands, water works, sewers, etc., $7,838,162.83; and its liabilities are but $2,218,465.44, as shown by the Controller's report, June 30, 1880.

The rate of taxation is much lower than prevails in any city of this class; and the excellent credit of the city is shown by the fact that, in 1880, $200,000 four per cent. bonds were readily sold—one-quarter at par and three-quarters at one-tenth per cent. premium.

WATER, FIRE AND POLICE DEPARTMENTS.

The city is abundantly supplied with excellent water from the river, and the Water Commissioners hold property worth $3,000,000, and handled $445,000 in 1880.

The city is well policed at a yearly cost of $135,000.

A very efficient fire department is maintained at a yearly cost of about $105,500.

THE PUBLIC SCHOOLS.

Are in charge of a Board of Education, and receive all possible support and attention. In this respect Detroit is as well provided for as any city in the country. Besides the public schools, there are many first-class private and denominational schools.

The number of persons of school age in the city is 39,467; whole number enrolled in the public schools, 14,182; average membership, 12,430; average daily attendance, 11,735; number of teachers employed, 256; seating capacity of the schools, 13,208.

The schools cost yearly, for superintendence and instruction, $148,777.75; incidental and current expenses, $42,011.89; total cost of education per capita, $16.57.

There are nearly thirty public school buildings, with a valuation of about $750,000.

NEWSPAPERS AND PERIODICALS.

Thirty-six newspapers and periodicals represent the political, religious, commercial, scientific, agricultural, temperance, social, and other interests of Detroit. Daily journalism is represented by the *Post and Tribune* (Republican), the *Free Press* (Democratic), and the *Evening News* (Independent), printed in the English language, and by the *Volksblatt* and *Abend Post* in German—the former Democratic and the latter independent Republican.

LIBRARIES.

The Public Library (sustained by fines, etc.) is in the charge of a library commission. It contains 40,496 volumes, and

ONE ORGANIZATION! ONE MANAGEMENT! ONE INTEREST!

VOLUMES ISSUED QUARTERLY.

Sheets of Changes Semi-Weekly. Constant Revisions and Prompt Notification to Subscribers.

We spare no effort to make our work complete, comprehensive, and reliable in all its features, and endeavor to anticipate the wants of our patrons. Owning and directing our whole business, from London to San Francisco, as from Montreal to New Orleans, we are able to control it in all its branches, and thus have unequaled facilities for its positive and prompt transaction, and it is not possible for the interest of our patrons to suffer from conflict of authority or interest with local managers.

Relying solely on the merits of our work, we respectfully solicit an examination of our system, with the assurance of our ability to substantiate all we claim, and with the knowledge that it is worthy of the earnest consideration of every grantor of credit.

This Agency was established in 1849, by J. M. BRADSTREET, who soon after admitted his son, under the firm style of J. M. BRADSTREET & SON. In 1863 the senior died, but by a Special Act of the Legislature of the State of New York the style remained the same. In April, 1876, the business was incorporated, and in August of the same year it was purchased by its present proprietors, and has since been conducted by them, under the style of THE BRADSTREET COMPANY.

From the commencement of the business down to the present day this Agency has never for an hour failed to fulfill its contracts with subscribers, and its volumes of Reports, as also its sheets of Changes and Corrections, have been issued with a regularity and punctuality as positive as the return of the day of the week and the month of the year. Its pronounced success is the best evidence that it has fulfilled the purposes for which it was created.

It has been, from its inception, the progressive Agency of the land, but especially since it came under its present management has it made rapid strides, always endeavoring to anticipate the wants of the mercantile community. Having no entangling alliances, owning and controlling its vast business in all its ramifications, it is presented to the commercial world today as the best exponent of a system which the peculiar characteristics of the country and people have made a necessity.

PORTER'S JOLIET BOTTLED LAGER BEER, ALE AND PORTER, is recommended by the Faculty. T. D. Stuver, Sole Agent, CHICAGO.

occupies a handsome building, erected specially for that purpose.

The Young Men's Library numbers 15,000 volumes.

There is also a respectable library in connection with the Y. M. C. A.

Two very complete law libraries are at the service of attorneys.

CHURCHES, CHARITIES, ETC.

In these respects Detroit is amply supplied, and among its church buildings are some of the finest in the Northwest.

The charitable enterprises of the city are under the charge of the "Associated Charities"; and there are also several excellent institutions for the relief of the poor and friendless.

Several well-conducted hospitals are doing a work of mercy.

AMUSEMENTS, SOCIETY MATTERS, ETC.

There are two large Opera Houses and half-a-dozen spacious halls — including Music-Hall, built last year at a cost of $75,000 and seating 3,040 people.

The Masonic and Odd Fellow fraternities are strong here. Both meet in costly Temples. All the other Orders are well represented, especially the beneficiary ones. There are several strong musical societies and orchestras, Detroit being eminently a musical city.

POPULATION AND PROSPECTS.

The growth of the city is shown by the following table:

1810	770
1840	9,102
1850	21,019
1860	40,137
1870	79,577
1880	116,342

This steady increase in population during the past decade has been matched by progress in other respects. Building has been pushed in all parts of the city. In 1880, 228 brick and 890 frame buildings were erected, at a cost of $1,641,338. Capital is continually pouring into the city, and there is every reason to think that the place has entered upon a career of greater prosperity than it has ever enjoyed.

GAFF, FLEISCHMANN & CO.

AND

H. TAUSZKY & CO. & A. JUNKER'S

COMPRESSED

YEAST

111 Bates Street, - Detroit, Mich.

GAFF, FLEISCHMANN & CO. AND H. TAUSZKY & CO. & A. JUNKER'S COMPRESSED YEAST are the best articles for all kinds of Bread-baking in the world. First Premiums awarded at all points in the United States where exhibited. Keep cool and dry; farmers or suburban residents can retain this Yeast fresh and reliable by immersing in water, using a small glass jar or vessel. The Yeast particles precipitate, and water covering prevents air spoiling the Yeast. Keep the water fresh on the Yeast Set vessel in cellar, or lower it into the well or cistern, attached to a string. When Yeast is desired for use, pour water off, take out what is needed with a spoon, and pour fresh water over the Yeast. In this manner it will keep for months.

To Young Men **Business University**

Mechanics' Hall, Detroit, Mich.

As an indication of the popularity of this Institution, letters of inquiry are received from all parts of the United States, as well as from France and other European countries. The patronage of the Institution has been derived from twenty-six different States, besides several European countries. Scores of young men who were former students and graduates of twenty-three different so-called Business Colleges and Commercial Night Schools, have attended this Institution and acknowledged its superiority over those they had previously attended. It is time and money thrown away to attend an inferior Institution at any price. Those desiring a business education should seek to enter the best Institution within their reach. The difference in expense, if any, will be outweighed by the excess of knowledge acquired. After over thirty-five years' experience as an accountant, teacher and conductor of some of the largest Business Colleges in three different States, the proprietor of this institution is prepared to give a course of instruction, furnish facilities, a corps of teachers and a suite of rooms superior to those of any similar Institution in this country. If those interested in a business education will call on us, and we fail to substantiate our claims, we will pay their expenses here and give them a course gratis. Ask the business men of Detroit about our Institution; they have employed hundreds of our graduates, and no better judges of its merits can be found. Besides the business men, we refer you to our army of graduates who are filling honorable and responsible positions in all the avenues of business. This institution being located in the metropolis of the State, possesses superior advantages for obtaining situations for its graduates, who are preferred and sought after, not only by merchants and bankers of Detroit, but frequent applications are being made from other cities throughout the State.
